Abstract of Information Available

Human remains representing, at least, one individual have been identified. No associated funerary objects are present.

Representatives from Western Washington University worked at 45–WH–17 in both 1973 and 1977. Dr. Garland Grabert directed a summer field school at the site in 1973. In 1977, Western Washington University entered a contract (C530–695–02) with the city of Blaine, WA, to conduct salvage in conjunction with the construction of the sewage treatment facility. Operations began in June and continued through the end of August 1977. One burial was recovered at 45–WH–17 in 1973 and a total of 40 burials were recovered during the 1977 project. All the known burials and associated funerary objects in the WWU collections from the 1973 and 1977 work were repatriated to the Lummi Nation in the early 1980's.

During the WWU NAGPRA compliance efforts in 1995, closer examination of faunal remains from 45–WH–17 resulted in numerous additional fragments of human bone being recognized. These human remains were listed in the original 1995 WWU NAGPRA Inventory and they, too, were repatriated to the Lummi Nation, upon their request in 2001. During the recent rehousing project described above, one additional human remain was identified from the 45–WH–17 collection and it is described below. No known individuals were identified. No hazardous chemicals are known to have been used to treat the human remains while in the custody of WWU.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains described in this notice.

Determinations

The WWU has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- There is a connection between the human remains described in this notice and the Lummi Tribe of the Lummi Reservation and the Nooksack Indian Tribe.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the human remains described in this notice to a requestor may occur on or after November 14, 2024. If competing requests for repatriation are received, the WWU must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. The WWU is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.
