

*Response:* Specific guidance on the period of analysis is not appropriate because of the vast differences in the characteristics of fisheries and the variety of management measures. A thorough knowledge of the particular fishery under consideration, and the nature of the proposed management measures and other relevant factors (as stated in the guidelines), must be considered before determining the appropriate period for the analysis.

*Comment 33:* The current section on "Risk and Uncertainty" does not emphasize the importance of providing a range of benefit-cost estimates as opposed to point estimates to the Councils.

*Response:* In addition to identifying three types of analyses to deal with risk and uncertainty, the guidelines state that the use of conservative or best estimates, or the use of a risk premium added to the social discount rate is not recommended.
