#### Description

The state of the nation's numbering resources has a direct effect on the growth of competition in the telecommunications industry. The nation's numbering resources are depleting rapidly. Under the Communications Act of 1934, as amended by the Telecommunications Act of 1996, Congress granted the Federal Communications Commission

(Commission) exclusive jurisdiction over the United States' portion of the North American Numbering Plan (NANP). See 47 U.S.C. 251(e). The purpose of the audits is to monitor telecommunications carriers' compliance with Commission's numbering rules and to verify the accuracy and validity of the numbering data submitted to the Commission. The audits will also allow the Commission to identify inefficiencies in the manner in which carriers use numbers, including excessive use of certain categories of numbers (*e.g.*, administrative, aging, or intermediate numbers). By ensuring compliance with Commission rules that promote efficient number usage, the numbering audits will help preserve the nation's numbering resources.

The Commission staff developed a standardized audit program for conducting random audits. This standard audit program consists of audit procedures, an internal controls questionnaire, and a corresponding data request. The independent auditor would conduct audits using these tools. The audit procedures generally require the audited carrier to respond to requests for information from the independent auditor. The internal controls questionnaire and the data request require audited carriers to respond to specific requests for information during the audit. The independent auditor will report its audit findings to the Commission. The Commission staff will review and modify the audit program on an on-going basis. The Commission will use the audit results to determine whether the audited carriers are complying with the Commission's rules, and whether the audited carriers' numbering data submitted to the Commission, *e.g.*, FCC Form 502, is accurate and valid. To the extent that the Commission finds evidence of potential violations, possible enforcement action may be taken. See Second Report and Order, 16 FCC Rcd at 349, para. 96; see also 47 CFR 52.15(k). Obligation to respond: Mandatory. Public reporting burden for the collections of information are as noted above. Send comments regarding the burden estimates or any other aspect of the collections of information, including suggestions for reducing the burden to Performance Evaluation and Records Management, Washington, DC 20554.

#### SUPPLEMENTARY INFORMATION:

1. On July 26, 2002, the Commission adopted an Order (E911 Small Carriers Order) staying certain wireless enhanced 911 (E911) Phase II deployment deadlines for Tier II and Tier III carriers, with conditions. (See Order to Stay in CC Docket No. 94-102, FCC 02-210, released July 26, 2002.) Pursuant to this Order, Tier II carriers were defined as non-nationwide carriers that had over 500,000 subscribers as of year-end 2001, and Tier III carriers were defined as all other non-nationwide carriers. In the E911 Small Carriers Order, the Commission noted that it would solicit public comment on the proposed size standard for Tier III carriers, in accordance with Section 121.902(b) of the SBA's small business size regulations. The Commission now seeks comment on this matter for purposes of obtaining SBA approval of the Tier III size standard. This action will not affect the deadlines or conditions set forth in the E911 Small Carriers Order, including applicable reporting requirements.

2. In the E911 Small Carriers Order, the Commission defined Tier II, or mid-size carriers, as those non-nationwide carriers with over 500,000 subscribers as of year-end 2001. The Commission

defined Tier III carriers as all other non-nationwide carriers. The Commission found this to be the appropriate level to distinguish between Tier II and Tier III carriers, noting that each of the Tier II carriers reported over \$85 million in annual revenues for 2001, and thus should have sufficient resources to pursue an E911 Phase II solution more quickly than the smaller carriers. The Commission reasoned that relatively larger carriers should have a greater ability to obtain location technologies in a shorter period of time as compared with the smallest carriers. Additionally, a standard based on number of subscribers rather than the number of employees may more accurately reflect the size of the carrier's wireless network and as a result, the scope of work required to implement Phase II service.

3. Interested parties may file comments on or before November 6, 2002, and reply comments on or before November 21, 2002. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS) or by filing paper copies.
