

effects assessed in the initial rulemaking (64 FR 171, 09/03/99).

Therefore, the staff has determined that there is no reduction in the safety margin nor significant environmental impacts as a result of placing loaded HI-STAR 100 Cask Systems on storage pads with a concrete compressive strength of less than or equal to 4,200 psi at 28 days and concrete reinforcement of 60 ksi yield strength ASTM material.

Alternative to the Proposed Action: Since there is no significant environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact are not evaluated. The alternative to the proposed action would be to deny approval of the exemption. Denial of the exemption request will have the same environmental impact.

Agencies and Persons Consulted: On May 19, 2000, Mr. J. Setzer, State Liaison Officer, Environmental Protection Division, State of Georgia, was contacted about the Environmental Assessment for the proposed action and had no comments.

Finding of No Significant Impact

The environmental impacts of the proposed action have been reviewed in accordance with the requirements set forth in 10 CFR Part 51. Based upon the foregoing EA, the Commission finds that the proposed action of granting an exemption from 10 CFR 72.212(a)(2), 72.212(b)(2)(i), and 72.214 so that SNC may place loaded HI-STAR 100 Cask Systems on concrete storage pads with a concrete compressive strength of less than or equal to 4,200 psi at 28 days and concrete reinforcement of 60 ksi yield strength ASTM material at the Hatch ISFSI will not significantly impact the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed exemption.

For further details with respect to this exemption request, see the SNC exemption request dated May 1, 2000, which is docketed under 10 CFR Part 72, Docket No. 72-36.

The exemption request is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW, Washington, DC, 20555.

Dated at Rockville, Maryland, this 1st day of June, 2000.
