SUPPLEMENTARY INFORMATION:

History

On January 3, 2014, the FAA published in the **Federal Register** a final rule establishing Class E surface airspace at Leesburg Executive Airport, Leesburg, VA (79 FR 346) Docket No. FAA-2013-0033. The Class E surface area airspace was published in error and is removed. Class E airspace designations are published in paragraph 6002 of FAA Order 7400.9X dated August 7, 2013, and effective September

15, 2013, which is incorporated by reference in 14 CFR Part 71.1.

The Rule

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 removes Class E surface area airspace within a 6-mile radius at Leesburg Executive Airport, Leesburg, VA, Potomac TRACON found the airspace would not add to the orderly flow of air traffic in the area. The final rule published in the **Federal Register** of January 3, 2014, (FR 79 346), Docket No. FAA-2013-0033, establishing Class E surface area airspace at Leesburg Executive Airport, Leesburg, VA, was published in error.

Since any delay in removing the controlled airspace in order to seek public comment would be inconsistent with the agency's safety mandate, immediate corrective action is required in the interest of flight safety. Therefore, notice and public procedure under 5 U.S.C. 553(b) is impracticable and contrary to the public interest. Also, in consideration of the need to remove this controlled airspace to avoid confusion on the part of pilots flying in the vicinity of Leesburg, VA, and the Washington Dulles International Airport area, the FAA finds good cause, pursuant to 5 U.S.C. 553(d), for making this amendment effective in less than 30 days in order to promote the safe and efficient handling of airspace in the area.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in

Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it removes controlled airspace at Leesburg Executive Airport, Leesburg, VA.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures," paragraph 311a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Alkyl Alcohol Alkoxyate Phosphate and Sulfate Derivatives; Exemption From the Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation amends two exemptions from the requirement of a tolerance for residues of α -alkyl (minimum C₆ linear, branched, saturated and/or unsaturated)- ω -hydroxypolyoxyethylene polymer with or without polyoxypropylene, mixture of di- and monohydrogen phosphate esters and the corresponding ammonium, calcium, magnesium, monoethanolamine, potassium, sodium, and zinc salts of the phosphate esters; minimum oxyethylene content is 2 moles; minimum oxypropylene content is 0 moles, herein referred to as alkyl alcohol alkoxyate phosphate derivatives (AAAPD) and α -Alkyl(C₆-C₁₅)- ω -hydroxypoly(oxyethylene)sulfate, and its ammonium, calcium, magnesium, potassium, sodium, and zinc salts, poly(oxyethylene) content averages 2-4 moles, herein referred to as alkyl alcohol alkoxyate sulfate derivatives (AAASD) when used as inert ingredients (surfactants) applied to growing crops and raw agricultural commodities after harvest under 40 CFR 180.910 and applied to animals under 40 CFR 180.930; not to exceed 30% of pesticide formulations. Joint Inerts Task Force Cluster Support Team 2 (JITF CST 2) c/o Huntsman Corp. submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), requesting an amendment to an existing requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of alkyl alcohol alkoxyate phosphate and sulfate derivatives.
