Guidelines for Assessing Marine Mammal Stocks

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability; response to comments.

SUMMARY: NMFS has incorporated public comments into revisions of the

guidelines for preparing stock assessment reports (SARs) pursuant to section 117 of the Marine Mammal Protection Act (MMPA). The revised guidelines are now complete and available to the public.

ADDRESSES: Electronic copies of the guidelines are available on the Internet at the following address: <http://www.nmfs.noaa.gov/pr/sars/guidelines.htm>.

FOR FURTHER INFORMATION CONTACT: Shannon Bettridge, Office of Protected Resources, 301-427-8402, Shannon.Bettridge@noaa.gov.

SUPPLEMENTARY INFORMATION:

Background

Section 117 of the Marine Mammal Protection Act (MMPA) (16 U.S.C. 1361 *et seq.*) requires NMFS and the U.S. Fish and Wildlife Service (FWS) to prepare stock assessments for each stock of marine mammals occurring in waters under the jurisdiction of the United States. These reports must contain information regarding the distribution and abundance of the stock, population growth rates and trends, estimates of annual human-caused mortality and serious injury from all sources, descriptions of the fisheries with which the stock interacts, and the status of the stock. Initial stock assessment reports (SARs, or Reports) were first completed in 1995.

NMFS convened a workshop in June 1994, including representatives from NMFS, FWS, and the Marine Mammal Commission (Commission), to develop draft guidelines for preparing SARs. The report of this workshop (Barlow *et al.*, 1995) included the guidelines for preparing SARs and a summary of the discussions upon which the guidelines were based. The draft guidelines were made available, along with the initial draft SARs, for public review and comment (59 FR 40527, August 9, 1994), and were finalized August 25, 1995 (60 FR 44308).

In 1996, NMFS convened a second workshop (referred to as the Guidelines for Assessing Marine Mammal Stocks, or "GAMMS," workshop) to review the guidelines and to recommend changes to them, if appropriate. Workshop participants included representatives from NMFS, FWS, the Commission, and the three regional scientific review groups (SRGs). The report of that workshop (Wade and Angliss, 1997) summarized the discussion at the workshop and contained revised guidelines. The revised guidelines represented minor changes from the initial version. The revised guidelines were made available for public review

and comment along with revised stock assessment reports on January 21, 1997 (62 FR 3005) and later finalized.

In September 2003, NMFS again convened a workshop (referred to as GAMMS II) to review the guidelines and again recommend minor changes to them. Participants at the workshop included representatives of NMFS, FWS, the Commission, and the regional SRGs. Changes to the guidelines resulting from the 2003 workshop were directed primarily toward identifying population stocks and estimating Potential Biological Removal (PBR) for declining stocks of marine mammals. The revised guidelines were made available for public review and comment on November 18, 2004 (69 FR 67541) and finalized on June 20, 2005 (70 FR 35397, NMFS 2005).

In February 2011, NMFS convened another workshop (referred to as GAMMS III) to review the guidelines and again recommend changes to them. Participants at the workshop included representatives from NMFS, FWS, the Commission, and the three regional SRGs. The objectives of the GAMMS III workshop were to (1) consider methods for assessing stock status (*i.e.*, how to apply the PBR framework) when abundance data are outdated, nonexistent, or only partially available; (2) develop policies on stock identification and application of the PBR framework to small stocks, transboundary stocks, and situations where stocks mix; and (3) develop consistent national approaches to a variety of other issues, including reporting mortality and serious injury information in assessments. Nine specific topics were discussed at the workshop. The deliberations of these nine topics resulted in a series of recommended modifications to the current guidelines (NMFS, 2005). The main body of the GAMMS III workshop report includes summaries of the presentations and discussions for each of the nine agenda topics, as well as recommended revisions to individual sections of the guidelines (Moore and Merrick, 2011). Appendices to the workshop report provide a variety of supporting documents, including the full proposed revision of the guidelines (Appendix IV). On January 24, 2012 (77 FR 3450), NMFS made the GAMMS III workshop report available for public review, and requested comment on the proposed revisions in Appendix IV. The report is available at http://www.nmfs.noaa.gov/pr/pdfs/sars/gamms3_nmfsopr47.pdf.
