FERC-511, Transfer of Electric License

OMB Control No.: 1902-0069.

Type of Request: Three-year extension of the FERC-511 information collection requirements with no changes to the current reporting requirements.

Abstract: The Commission uses the information collected under the requirements of FERC-511 to implement the statutory provisions of Sections 4(e) and 8 of the Federal Power Act (FPA).¹ Section 4(e) authorizes the Commission to issue licenses for the construction, operation and maintenance of reservoirs, powerhouses, and transmission lines or other facilities necessary for the development and improvement of navigation and for the development, transmission, and utilization of power.² Section 8 of the FPA provides that the voluntary transfer of any license is made only with the written approval of the Commission. Any successor to the licensee may assign the rights of the original licensee but is subject to all of the conditions of the license. The information filed with the Commission is a mandatory requirement contained in the format of a written application for transfer of license, executed jointly by the parties of the proposed transfer. The sale or merger of a licensed hydroelectric project may occasion the transfer of a license. The Commission's staff uses the information collection to determine the qualifications of the proposed transferee to hold the license and to prepare the transfer of the license order. Approval by the Commission of transfer of a license is contingent upon the transfer of title to the properties under license, delivery of all license instruments, and evidence that such transfer is in the public interest. The Commission implements these filing requirements in the Code of Federal Regulations (CFR) under 18 CFR part 9.

Type of Respondents: Hydropower Project Licensees.

Estimate of Annual Burden: The Commission estimates the annual public reporting burden for the information collection as:

¹ 16 U.S.C. 797(e) and 801.

² Refers to facilities across, along, from, or in any of the streams or other bodies of water over which

Congress has jurisdiction under its authority to regulate commerce with foreign nations and among the several States, or upon any part of public lands

and reservations of the United States, or for the purpose of utilizing the surplus water or water power from any Government dam.
