

public and more clearly explains how information related to an individual associated with a proposal should be presented to the Federal Reserve. As a complement to those changes, a new filing certification section would be added that requires an Applicant to confirm the nature of the information being submitted in the application and recognize how the submitted information may be treated under the FOIA. The Board's Legal Division believes that receiving the certification at the time of submission would facilitate the disclosure of relevant information to the public and reduce the processing delays that result from uncertainties about what information is eligible for disclosure under the FOIA. Two sections (Related Applications and Preliminary Charter Approval) would be deleted as the guidance in those sections has been incorporated into other sections of the instructions.⁴

Section I (De Novo Bank) of the FR 2083 application form would be revised to state that the Federal Reserve need not receive a copy of the electronic version of the Interagency Charter and Federal Deposit Insurance Application (ICFDA) that is prepared for and submitted to other banking agencies. This proposed revision is made in recognition of the fact that the Federal Reserve expects in 2009 to be able to accept all applications electronically. Such membership applications would include the ICFDA materials.

The Federal Reserve proposes to clarify certain information requests in Section II (Currently Operating Bank). The clarifications would assist an Applicant in better explaining the contemplated financial and managerial changes and structure that may result from the membership proposal. These clarifications include the following: In current question 7, the request for certain authority(ies) would help identify the need for other related applications earlier in the applications review process and therefore facilitate more timely review and action on the proposed transaction. The Federal Reserve proposes one minor clarification to Section III (Non-Operating Bank) to emphasize that an Applicant needs to disclose both financial and managerial changes resulting from a membership proposal.

The FR 2083A would be revised to reflect the possible negative adjustment

to a bank's total face amount of capital and surplus data that might be necessary to calculate the appropriate level of Federal Reserve Bank stock to be purchased. Footnote 1 would be expanded to explain the possible adjustment. Several technical edits would be made to the FR 2083B and the FR 2083C.⁵

Most individual respondent data are not considered confidential. Applicants may, however, request that parts of their membership applications be kept confidential, but in such cases the Applicant must justify its request by demonstrating how an exemption under the Freedom of Information Act (FOIA) is satisfied. The confidentiality status of the information submitted will be judged on a case-by-case basis.

Abstract: These application forms are required by the Federal Reserve Act and Regulation I. These forms must be used by a new or existing member bank (including a national bank) to request the issuance, and adjustment in, or cancellation of Federal Reserve Bank stock. The forms must contain certain certifications by the applicants, as well as certain other financial and shareholder data that is needed by the Federal Reserve to process the request.

Current actions: The Federal Reserve proposes no revisions to the FR 2086 and 2087. The revisions proposed to the remaining four application forms (the FR 2030, 2030a, 2056, and 2086a) are intended to facilitate the processing of each application form by the appropriate Reserve Bank and the calculation of the appropriate Federal Reserve Bank stock to be purchased or adjusted. Additional signature lines would be added to all four application forms to ensure that they are signed by at least one individual listed with the appropriate Reserve Bank (as having the authority to submit accounting- and other reporting-related materials on behalf of the bank) in the event that the senior officials required to authorize the purchase or adjustment, under the Federal Reserve Act, are not listed.

On the FR 2056, the Federal Reserve proposes to clarify the appropriate components of capital and surplus used in the Federal Reserve Bank stock calculation and to more clearly explain the possible negative capital adjustment within those calculations. In addition, the references in the accompanying worksheet would fully correspond to the Consolidated Reports of Condition and Income (FFIEC 031 and 041; OMB No. 7100-0036) data items filed by commercial banks. The references to Sinking Fund preferred stocks would be deleted as these instruments are generally no longer issued and may no longer qualify as regulatory capital.
