DEPARTMENT OF COMMERCE**International Trade Administration****Mission Statement; Aerospace Supplier Development Mission to China; October 26–November 4, 2008**

AGENCY: Department of Commerce.

ACTION: Notice.

Mission Description

The Aerospace Supplier Development Mission to China was developed in response to requests from many small and medium-sized enterprises (SMEs) supplying the aviation industry, and is intended to include representatives from a variety of U.S. aerospace industry manufacturers and service providers. The mission will introduce these suppliers to end-users and prospective partners whose needs and capabilities are targeted to each U.S. participant's strengths. Participating in an official U.S. industry delegation will enhance the companies' ability to secure meetings in China. The mission will include appointments and briefings in Beijing, Shanghai, Suzhou, and Guangzhou, some of China's major aerospace industry hubs, as well as participation in Airshow China in Zhuhai to conclude the mission. The mission participants will also have opportunities to interact extensively with CS China aviation specialists.

Commercial Setting

The Chinese aerospace sector ranks among the world's most dynamic, going far beyond the country's massive investment in aircraft (mainland carriers anticipate doubling the size of their fleets to 1,500 by 2010, reaching 4,000 by 2025). Chinese aerospace companies have rapidly developed into serious players in the industry's global value chain. Chinese aerospace firms, including those linked to U.S. and European "primes," now frequently make their own sourcing decisions, participate as "risk sharing partners" in new airframe and engine development programs, or take on the role of first-tier suppliers on Chinese programs.

The evolution of China's aerospace industry is part of a broader industry
