SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is issuing a revision to an existing guide in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public information

regarding methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific issues or postulated events, and data that the staff needs in its review of applications for permits and licenses.

Revision 2 of RG 1.215 was issued with a temporary identification as Draft Regulatory Guide, DG-1316. This revision (Revision 2) of RG 1.215 approves for use Nuclear Energy Institute (NEI) 08-01, "Industry Guideline for the ITAAC Closure Process under 10 CFR part 52," Revision 5—Corrected (Ref. 2), subject to certain exceptions and additional guidance described in this regulatory guide under Section C, Staff Regulatory Guidance. The NEI 08-01, Revision 5—Corrected, was updated to include additional guidance related to ITAAC maintenance, lessons learned from simulated ITAAC closure implementation, changes to the information and formatting guidance for uncompleted ITAAC notifications, and other enhancements.

II. Additional Information

Draft Guide 1316 was published in the **Federal Register** on January 5, 2015 (80 FR 265) for a 60-day public comment period. The public comment period closed on March 6, 2015. Public comments on DG-1316 and the staff responses to the public comments are available under ADAMS Accession Number ML15105A446.

III. Congressional Review Act

This regulatory guide is a rule as defined in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

IV. Backfitting and Issue Finality

This regulatory guide approves updated industry guidance for ITAAC closure, including the different kinds of ITAAC notifications required by 10 CFR 52.99. Issuance of this regulatory guide is not inconsistent with the issue finality provisions in 10 CFR part 52. As discussed in the "Implementation" section of this regulatory guide, the NRC has no current intention to impose this regulatory guide on current holders of combined licenses. In addition, the matters in this regulatory guide are not within the matters subject to issue finality protection under 10 CFR 52.83 or 10 CFR 52.98. Therefore, any imposition of this regulatory guide on current holders of combined licenses, or

current and future applicants for combined licenses, would not be inconsistent with any issue finality protection under 10 CFR 52.83 or 10 CFR 52.98.

Dated at Rockville, Maryland, this 16th day of July, 2015.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with § 51.118 of Title 10 of the *Code of Federal Regulations*, the NRC is making available final Supplement 54 to the GEIS regarding the renewal of Exelon operating licenses NPF-37 and NPF-66 for an additional 20 years of operation for Byron. Draft Supplement 54 to the GEIS was noticed by the NRC in the **Federal Register** on January 2, 2015 (80 FR 55), and noticed by the Environmental Protection Agency on January 2, 2015 (80 FR 41). The public comment period on draft Supplement 54 to the GEIS ended on February 20, 2015, and the comments received are addressed in final Supplement 54 to the GEIS. Final Supplement 54 to the GEIS is available as indicated in the **ADDRESSES** section of this document.

II. Discussion

As discussed in chapter 5 of the final Supplement 54 to the GEIS, the NRC determined that the adverse environmental impacts of license renewal for Byron are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) The analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by Exelon; (3) consultation with Federal, State, local, and Tribal agencies; (4) the NRC staff's independent environmental review; and (5) consideration of public comments received during the scoping process and on the Draft Supplemental Environmental Impact Statement.

Dated at Rockville, Maryland, this 16th day of July 2015.

For the Nuclear Regulatory Commission.

Chief, Projects Branch 2, Division of License Renewal, Office of Nuclear Reactor Regulation.

Lost Creek ISR, LLC

AGENCY: Nuclear Regulatory Commission.
