Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Oil and Natural Gas Production (40 CFR part 63, subpart HH) were proposed on February 6, 1998, and promulgated on June 17, 1999, only for major sources. On July 8, 2005, a supplemental proposal was proposed for area sources, with the final rule effective date on January 3, 2007. The rule was subsequently amended on August 16, 2012, to include emission sources for which standards were not previously developed. These regulations apply to emission points located at both new and existing oil and natural gas production facilities that are both major and area sources. A major source of hazardous air pollutants (HAP) is one that has the potential to emit 10 tons or more of any single HAP or 25 tons or more of total HAP per year; an area source is one with the potential to emit less than these amounts. New facilities include those that commenced either construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart HH.

Form Numbers: None.

Respondents/affected entities: Oil and natural gas production facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart HH).

Estimated number of respondents: 5,146 (total).

Frequency of response: Initially, semiannually.

Total estimated burden: 60,600 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$8,390,000 (per year), which includes \$1,110,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is an increase in burden from the most-recently approved ICR currently identified in the OMB Inventory of Approved Burdens due to an increase in the number of new or modified sources. This ICR updates the number of affected sources subject to these regulations based on an assumption that the industry continues to grow at a constant rate since the previous renewal. Because the industry growth rate is constant, the number of new sources each year is constant, and there is no change in the capital/startup costs from the most recently approved ICR. However, the number of existing sources has increased due to the industry growth

rate, resulting in an increase to the operation & maintenance (O&M) costs.

Director, Regulatory Support Division.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments shall be submitted on or before January 27, 2023. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should

advise the contacts below as soon as possible.

Total Annual Burden: 750 hours.

Annual Cost Burden: \$208,220.

Needs and Uses: FCC Form 2100, Schedule B (formerly FCC Form 302-DTV) is used by licensees and permittees of full power broadcast stations to obtain a new or modified station license and/or to notify the Commission of certain changes in the licensed facilities of those stations. It may be used: (1) To cover an authorized construction permit (or auxiliary antenna), provided that the facilities have been constructed in compliance with the provisions and conditions specified on the construction permit; or (2) To implement modifications to existing licenses as permitted by 47 CFR 73.1675(c) or 73.1690(c).

The information collection requirements contained in section

73.3700(b)(3) require the licensee of each channel sharee station and channel sharer station to file an application for a license for the shared channel using FCC Form 2100 Schedule B (for a full power station) or F (for a Class A station) within six months of the date that the channel sharee station licensee receives its incentive payment pursuant to section 6403(a)(1) of the Spectrum Act.

The information collection requirements contained in section 73.3700(h)(2) state that, upon termination of the license of a party to a CSA, the spectrum usage rights covered by that license may revert to the remaining parties to the CSA. Such reversion shall be governed by the terms of the CSA in accordance with paragraph (h)(4)(E) of this section. If upon termination of the license of a party to a CSA only one party to the CSA remains, the remaining licensee may file an application to change its license to non-shared status using FCC Form 2100, Schedule B (for a full power licensee) or F (for a Class A licensee).

Lastly, section 73.3800 allows full power television stations to channel share with other full power stations, Class A, LPTV and TV translator stations outside of the incentive auction context. Full power stations file FCC Form 2100, Schedule B in order to complete the licensing of their shared channel.
