

Appendix A

Sample Submission

Who you are—*quieteveningathome.org*—We are a 501c3 group with 50,000 members dedicated to the preservation of the dinner hour as the core of American civilization.

Game-changing dimension—Change the rules.

Concept—Telemarketers are using our resources and time to market their products. They can call and interrupt our dinners and use our own telephones to reach us. What if we changed the rules to “don’t call us, we’ll call you?”

Vision—The vision is a national do-not-call register. People should be able to go to donotcall.gov and register their phone number. It would be illegal for telemarketers who have not been given permission to call someone. If a telemarketer makes an illegal call, the recipient should be able to report them to a government agency and they should be fined. The technology to do this is easy, we are not sure about the laws and policies. Courts have ruled differently on this issue at different times. We think the political climate is friendly today for Federal legislation.

Method—We announced our search for ideas on our website and submissions were made there. We also publicized through restaurant and catering associations with whom we often partner, who offered interruption-free meals for brainstorming sessions. Participation was not limited to members, but could not be anonymous, since it was our intention to follow up with submitters. The Board of Directors of QEAH enlisted the aid of Prandia University to work with the submitters of the best ideas to develop them into even better ideas. The Board ensured all the aspects described in the Leap Year RFI were addressed in our final submissions.

Dream team—Federal Trade Commission, Federal Communications Commission, constitutional lawyer, Telemarketers’ Association, Consumer Union, Oracle or other database company.

Review Considerations

Submissions will be reviewed by the NITRD Senior Steering Group for Cybersecurity using the following considerations:

- Would it change the game?
- How clear is the way forward?
- What heights are the hurdles that may be found in the way forward?

Submitted by the National Science Foundation for the National Coordination Office (NCO) for

Networking and Information Technology Research and Development (NITRD) on October 8, 2008.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52–029 AND 52–030]

Progress Energy Florida, Inc. Acceptance for Docketing of an Application for Combined License for Levy County Nuclear Power Plant Units 1 and 2

By letter dated July 28, 2008, Progress Energy Florida, Inc. (PEF) submitted an application to the U.S. Nuclear Regulatory Commission (NRC) for a combined license (COL) for two AP1000 advanced passive pressurized water reactors in accordance with the requirements contained in 10 CFR 52, “Licenses, Certifications and Approvals for Nuclear Power Plants.” These reactors will be identified as Levy Nuclear Power Plant (LNP) Units 1 and 2 and located at a site in Levy County, Florida. A notice of receipt and availability of this application is currently awaiting publication in the **Federal Register**.

The NRC staff has determined that PEF has submitted information in accordance with 10 CFR Part 2, “Rules of Practice for Domestic Licensing Proceedings and Issuance of Orders,” and 10 CFR Part 52 that is acceptable for docketing. The docket numbers established for the LNP Units 1 and 2 COL application are 52–029 and 52–030, respectively.

The NRC staff will perform a detailed technical review of the application. Docketing of the application does not preclude the NRC from requesting additional information from the applicant as the review proceeds, nor does it predict whether the Commission will grant or deny the application. The Commission will conduct a hearing in accordance with Subpart L, “Informal Hearing Procedures for NRC Adjudications,” of 10 CFR Part 2 and will receive a report on the COL application from the Advisory Committee on Reactor Safeguards in accordance with 10 CFR 52.87, “Referral to the Advisory Committee on Reactor Safeguards (ACRS).” If the Commission finds that the COL application meets the applicable standards of the Atomic Energy Act and the Commission’s

regulations, and that required notifications to other agencies and bodies have been made, the Commission will issue a COL, in the form and contain conditions and limitations that the Commission finds appropriate and necessary.

In accordance with 10 CFR Part 51, the Commission will also prepare an environmental impact statement for the proposed action. Pursuant to 10 CFR 51.26, and as part of the environmental scoping process, the staff intends to hold a public scoping meeting. Detailed information regarding this meeting will be included in a future **Federal Register** notice.

Finally, the Commission will publish in the **Federal Register** a notice of hearing, which will notice the opportunity to petition to intervene.

Documents may be examined, and/or copied for a fee, at the NRC’s Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland 20852, and will be accessible electronically through the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room link at the NRC Web site <http://www.nrc.gov/reading-rm/adams.html>. The application is also available at <http://www.nrc.gov/reactors/new-licensing/col.html>. Persons who do not have access to ADAMS or who encounter problems in accessing documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1–800–397–4209, 301–415–4737, or by e-mail to pdrr@nrc.gov.

Dated at Rockville, Maryland, this 6th day of October 2008.

For the Nuclear Regulatory Commission.

Brian Anderson,

Lead Project Manager, AP1000 Projects Branch 1, Division of New Reactor Licensing, Office of New Reactors.
