

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

The Boeing Company: Docket No. FAA–2014–0755; Directorate Identifier 2014–NM–080–AD.

(a) Comments Due Date

We must receive comments by December 22, 2014.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all The Boeing Company airplanes identified in paragraphs (c)(1) through (c)(4) of this AD, certificated in any category.

(1) Model 737–600, –700, –700C, –800, –900, and –900ER series airplanes.

(2) Model 757–200, –200PF, –200CB, and –300 series airplanes.

(3) Model 767–200, –300, –300F, and –400ER series airplanes.

(4) Model 777–200, –200LR, –300, –300ER, and –777F series airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 28, Fuel Selector/Shut-off Valve.

(e) Unsafe Condition

This AD results from fuel system reviews conducted by the manufacturer. We are issuing this AD to prevent electrical energy from lightning, hot shorts, or fault current from entering the fuel tank through the actuator shaft, which could result in fuel tank explosions and consequent loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Inspection To Determine Part Number

Within 60 months after the effective date of this AD: Do an inspection to determine whether any motor-operated shutoff valve (MOV) actuators having part number (P/N) MA20A1001–1 (S343T003–39) for the fuel tanks or fuel feed system are installed on the airplane. A review of airplane maintenance records is acceptable in lieu of this inspection if the part number of the actuator can be conclusively determined from that review.

(h) Replacement

If, during the inspection required by paragraph (g) of this AD, any MOV actuator having (P/N) MA20A1001–1 (S343T003–39) for the fuel tanks is installed: Within 60 months after the effective date of this AD,

replace the affected MOV actuator with a serviceable, FAA-approved MOV actuator other than one having P/N MA20A1001–1 (S343T003–39).

(i) Parts Installation Prohibition

As of the effective date of this AD, no person may install an MOV actuator having part number MA20A1001–1 (S343T003–39) on any airplane.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: 9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

The proposal would place a greater emphasis on the more serious safety and health conditions and provide improved safety and health for miners. MSHA is also proposing alternatives that would address the scope and applicability of its civil penalty regulation.

The comment period was scheduled to close on September 29, 2014. MSHA extended the comment period until December 3, 2014 (79 FR 55408) in response to commenters.
