

that has control of these cultural items. The National Park Service is not responsible for the determinations within this notice.

The four cultural items are two latten spoons and two small copper bells.

In 1800, these four cultural items were recovered from burials during excavations conducted by person(s) unknown at the Burr's Hill site, Warren, RI. In 1835, these cultural items were purchased by the Rhode Island Historical Society from "Chesebrough." Museum documentation identifies these spoons as having come from an Indian interment. No further documentation is present.

Burr's Hill is believed to be located on the southern border of Sowams, a Wampanoag village. Sowams is identified in historical documents of the 16th and 17th centuries as a Wampanoag village, and was ceded to the English in 1653 by Massasoit and his eldest son Wamsutta (Alexander). Sporadic finds and excavations have been made at this site since the middle of the 19th century through the early 20th century. Based on the presence of European trade goods and types of cultural items, these cultural items have been dated to between A.D. 1600–1710. Based on accession records and condition of the cultural items, these cultural items have been determined to be grave goods.

Based on the above-mentioned information, officials of the Rhode Island Historical Society have determined that, pursuant to 43 CFR 10.2 (d)(2)(ii), these four cultural items are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony and are believed, by a preponderance of the evidence, to have been removed from a specific burial site of an Native American individual. Officials of the Rhode Island Historical Society also have determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity that can be reasonably traced between these items and the Wampanoag Repatriation Confederation, representing the Wampanoag Tribe of Gay Head (Aquinnah), the Mashpee Wampanoag (a non-Federally recognized Indian group), and the Assonet Band of the Wampanoag Nation (a non-Federally recognized Indian group). This notice has been sent to officials of the Wampanoag Repatriation Confederation, the Wampanoag Tribe of Gay Head (Aquinnah), the Mashpee Wampanoag (a non-Federally recognized Indian group), the Assonet Band of the Wampanoag Nation (a non-Federally

recognized Indian group), the Narragansett Indian Tribe of Rhode Island, and the Council of Seven/Royal House of Pokanoket/Pokanoket Tribe/Wampanoag Nation (a non-Federally recognized Indian group). Representatives of any other Indian tribe that believes itself to be culturally affiliated with these unassociated funerary objects should contact Linda Eppich, Chief Curator, The Rhode Island Historical Society, 110 Benevolent Street, Providence, RI 02906, telephone (401) 331–8575, before November 1, 2000. Repatriation of these unassociated funerary objects to the Wampanoag Repatriation Confederation, representing the Wampanoag Tribe of Gay Head (Aquinnah), the Mashpee Wampanoag (a non-Federally recognized Indian group), and the Assonet Band of the Wampanoag Nation (a non-Federally recognized Indian group) may begin after that date if no additional claimants come forward.

Dated: September 21, 2000.

John Robbins,

Assistant Director, Cultural Resources Stewardship and Partnerships.

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion for Native American Human Remains and Associated Funerary Objects from Iowa in the Possession of the State Historical Society of Iowa, Des Moines, IA

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act (NAGPRA), 43 CFR 10.2 (d)(1), of the completion of an inventory of human remains and associated funerary objects in the possession of the State Historical Society of Iowa, Keyes Collection, Des Moines, IA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 43 CFR 10.2 (c). The determinations within this notice are the sole responsibility of the museum, institution, or Federal agency that has control of these Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations within this notice.

A detailed assessment of the human remains was made by the Office of the State Archaeologist of Iowa professional staff in consultation with representatives of the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota.

In 1934 and 1939, human remains representing 10 Mill Creek individuals were excavated from site 13PM1, Broken Kettle, Plymouth County, northwestern Iowa, by Ellison Orr, under the direction of Charles R. Keyes. No known individuals were identified. The 89 associated funerary objects include clamshells, pottery fragments, a chert flake, and a fire-cracked rock.

In 1939, human remains representing nine individuals were excavated from the Kimball site, 13PM4, Plymouth County, northwestern Iowa, by Ellison Orr, under the direction of Charles R. Keyes. No known individuals were identified. No associated funerary objects are present.

In 1934, human remains representing six individuals were excavated from site 13PM127, Ossuary 2, Plymouth County, northwestern Iowa, by Ellison Orr, under the direction of Charles R. Keyes. No known individuals were identified. No associated funerary objects are present.

The human remains and associated funerary objects included in this notice were recovered from excavations undertaken by Charles R. Keyes and Ellison Orr in northwestern Iowa between 1934 and 1939. They now form part of the Charles R. Keyes Archaeological Collection. Based on archeological and biological evidence, and similarities in material culture, these sites and remains have been identified as belonging, or probably belonging, to the Mill Creek cultural group that occupied this area in the 12th and 13th centuries. The Mandan and Hidatsa peoples are believed to be possibly culturally affiliated with the Mill Creek based on tenuous continuities of material culture and historical documents.

Based on the above-mentioned information, officials of the State Historical Society of Iowa have determined that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of 25 individuals of Native American ancestry. Officials of the State Historical Society of Iowa also have determined that, pursuant to 43 CFR 10.2 (d)(2), the 89 objects listed above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the State Historical Society of Iowa have

determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity that can be reasonably traced between these Native American human remains and associated funerary objects and the Mandan and Hidatsa tribes, members of the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota.

This notice has been sent to officials of the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota. Representatives of any other Indian tribe that believes itself to be culturally affiliated with these human remains and associated funerary objects should contact Jerome Thompson, State Historical Society of Iowa, New Historical Building, 600 East Locust, Des Moines, IA 50319-0290, telephone (515) 281-4221, before November 1, 2000. Repatriation of these human remains and associated funerary objects to the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota may begin after that date if no additional claimants come forward.

Dated: September 19, 2000.

John Robbins,

*Assistant Director, Cultural Resources
Stewardship and Partnerships.*

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion for Native American Human Remains and Associated Funerary Objects in the Possession of the University of Nebraska-Lincoln, Lincoln, NE

AGENCY: National Park Service.

ACTION: Notice.

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act (NAGPRA), 43 CFR 10.9, of the completion of an inventory of human remains and associated funerary objects in the possession of the University of Nebraska-Lincoln, Lincoln, NE.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 43 CFR 10.2 (c). The determinations within this notice are the sole responsibility of the museum, institution, or Federal agency that has control of these Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations within this notice.

A detailed assessment of the human remains and associated funerary objects was made by University of Nebraska-Lincoln professional staff in consultation with representatives of the Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota; the Iowa Tribe of Oklahoma; the Kickapoo Tribe of Indians of the Kickapoo Reservation in Kansas; the Oglala Sioux Tribe of the Pine Ridge Reservation, South Dakota; the Omaha Tribe of Nebraska; the Pawnee Nation of Oklahoma; the Ponca Tribe of Nebraska; the Ponca Tribe of Indians of Oklahoma; the Rosebud Sioux Tribe of the Rosebud Indian Reservation, South Dakota; the Santee Sioux Tribe of the Santee Reservation of Nebraska; the Winnebago Tribe of Nebraska; the Yankton Sioux Tribe of South Dakota; and the North Dakota Intertribal Reinterment Committee representing the Standing Rock Sioux Tribe of North and South Dakota; the Spirit Lake Tribe, North Dakota; the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota; and the Turtle Mountain Band of Chippewa Indians of North Dakota.

In 1955, human remains representing one individual were recovered from the Sheep Mountain site (25BN1), Banner County, NE during a University of Nebraska field school directed by E.M. Davis. No known individual was identified. No associated funerary objects are present.

Based on archeological evidence, this individual has been identified as Native American from the Archaic period.

In 1977, human remains representing one individual from site 25BO8, Boone County, NE was acquired under unknown circumstances from person(s) unknown. No known individual was identified. The one associated funerary object is a soil sample with red ochre.

Based on dental morphology and wear, the condition of the human remains, and the presence of red ochre, this individual has been identified as Native American from the Archaic period.

In 1973, human remains representing nine individuals were excavated from an ossuary (probably 25BO12) located north of Cedar Rapids, Boone County, NE by Steve Holen and John O'Shea. In 1976, these human remains were transferred to the University of Nebraska State Museum from the University of Nebraska Department of Anthropology. No known individuals were identified. No associated funerary objects are present.

The condition of these human remains resembles those from known Archaic, Woodland, or Central Plains Tradition sites, however, these human

remains are too fragmentary to assign temporal or cultural affiliation.

In 1937, human remains representing one individual were recovered from a sand pit at the Hemmingford fossil quarries in Box Butte County, NE by a Works Progress Administration worker. No known individual was identified. No associated funerary objects are present.

Based on the recovery location and copper staining of the human remains, this individual has been determined to be Native American from the historic period.

During the 1970's, human remains representing one individual were recovered from site 25BF179, Buffalo County, NE by members of the University of Nebraska Department of Anthropology. No known individual was identified. The one associated funerary object present is an antler fragment.

In the 1960's, this individual was originally disturbed by county residents and re-interred in a metal can. The original burial was said to have been in a sitting position. An additional associated funerary object, a bannerstone believed to be mid-Archaic, was retained by πBus' Curd of Amherst, NE.

Based on the reported manner of interment, associated funerary objects, and highly mineralized condition of the human remains, this individual has been identified as Native American from the Archaic period.

In 1958, human remains representing seven individuals were excavated from site 25BF229, 2.5-3 miles southeast of Gibbon, Buffalo County, NE by T. Witty and P. Holder. No known individuals were identified. No associated funerary objects are present.

Based on the condition of the human remains, these individuals have been identified as Native American, dating to the Woodland period.

In 1913, human remains representing one individual were lent to the University of Nebraska State Museum by A.A. McReynolds of Nehawka, NE. These remains are presumed to have been recovered from the vicinity of Nehawka, Cass County, NE. These human remains now are considered part of the permanent collection. No known individual was identified. No associated funerary objects are present.

Based on dental morphology and the condition of the human remains, this individual has been identified as Native American dating to the Woodland or Central Plains Tradition period.

In 1965, human remains representing one individual were catalogued into the collections of the University of Nebraska State Museum. The associated
