NUCLEAR REGULATORY COMMISSION

Advisory Committee on Nuclear Waste Renewal Notice

AGENCY: Nuclear Regulatory Commission.

ACTION: This notice is to announce the renewal of the Advisory Committee on Nuclear Waste (ACNW) for a period of two years.

SUPPLEMENTARY INFORMATION: The U.S. Nuclear Regulatory Commission (NRC) has determined that the renewal of the charter for the Advisory Committee on Nuclear Waste for the two year period commencing on May 23, 2002, is in the public interest, in connection with duties imposed on the Commission by

law. This action is being taken in accordance with the Federal Advisory Committee Act, after consultation with the Committee Management Secretariat, General Services Administration.

The purpose of the Advisory Committee on Nuclear Waste is to report to and advise the Nuclear Regulatory Commission (NRC) on nuclear waste management. The bases of ACNW reviews include 10 CFR parts 20, 40, 50, 60, 61, 63, 70, 71 and 72, and other applicable regulations and legislative mandates. In performing its work, the Committee will examine and report on those areas of concern referred to it by the Commission and may undertake studies and activities on its own initiative, as appropriate. Emphasis will be on protecting the public health and safety in the disposal of nuclear waste. The Committee will undertake studies and activities related to nuclear waste management such as transportation, storage and disposal facilities, the effects of low levels of ionizing radiation, decommissioning, materials safety, application of risk-informed, performance-based regulations, and evaluation of licensing documents, rules and regulatory guidance. The Committee will interact with representatives of the public, NRC, ACRS, other Federal agencies, State and local agencies, Indian Tribes, and private, international and other organizations as appropriate to fulfill its responsibilities.

FOR FURTHER INFORMATION PLEASE

CONTACT: John T. Larkins, Executive Director of the Committee, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 415–7360.

Dated: May 23, 2002.

Andrew L. Bates,

Federal Advisory Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. (as shown in Attachment 1), License Nos. (as shown in Attachment 1), EA–02–077]

In the Matter of All Decommissioning Power Reactor Licensees; Order Modifying Licenses (Effective Immediately)

I

The licensees identified in Attachment 1 to this Order hold licenses issued by the U.S. Nuclear Regulatory Commission (NRC or Commission) authorizing possession of nuclear power

plants in accordance with the Atomic Energy Act of 1954 and 10 CFR part 50. Commission regulations at 10 CFR 50.54(p)(1) require these licensees to maintain safeguards contingency plan procedures in accordance with 10 CFR part 73, appendix C. Specific safeguards requirements are contained in 10 CFR 73.55.

II.

On September 11, 2001, terrorists simultaneously attacked targets in New York, N.Y., and Washington, D.C., utilizing large commercial aircraft as weapons. In response to the attacks and intelligence information subsequently obtained, the Commission issued a number of Safeguards and Threat Advisories to its licensees in order to strengthen licensees' capabilities and readiness to respond to a potential attack on a nuclear facility. The Commission has also communicated with other Federal, State and local government agencies and industry representatives to discuss and evaluate the current threat environment in order to assess the adequacy of security measures at licensed facilities. In addition, the Commission has commenced a comprehensive review of its safeguards and security programs and requirements.

As a result of its initial consideration of current safeguards and security plan requirements, as well as a review of information provided by the intelligence community, the Commission has determined that certain compensatory measures are required to be implemented by licensees as prudent, interim measures to address the current threat environment in a consistent manner throughout the nuclear reactor community. Therefore, the Commission is imposing requirements, as set forth in Attachment 2¹ of this Order, on all decommissioning power reactor licensees. These interim requirements, which supplement existing regulatory requirements, will provide the Commission with reasonable assurance that the public health and safety, and common defense and security continue to be adequately protected in the current threat environment. These requirements will remain in effect pending notification from the Commission that a significant change in the threat environment has occurred, or until the Commission determines that other changes are needed following a comprehensive re-evaluation of current safeguards and security programs.

¹ Attachment 2 contains SAFEGUARDS information and will not be released to the public.
