

scientific and technical knowledge is being developed and used in stakeholder processes, and identifying strategies which might allow such knowledge to be better developed and used in such processes in the future. Based on information gained in these workshops and published information on the use of science in stakeholder processes, the SAB will finalize its Commentary (Improving Science-Based Environmental Stakeholder Processes) to the Administrator. The Commentary will provide advice to help Agency improve public involvement processes for environmental protection and the use of science in those processes.

At the March 22 teleconference, the SAB EC will be seeking public input on: (1) Whether the draft Commentary makes factual errors; (2) whether there is important evidence or published literature that the draft Commentary needs to better acknowledge or incorporate; and (3) suggestions for ways the draft Commentary may be improved. Given the fact-finding nature of this teleconference call, the SAB EC requests that members of the public seeking to provide oral comments provide a text of their comments in writing to the Designated Federal Officer, Dr. Angela Nugent by noon on March 19, 2001 via e-mail, fax or mail (see contact information below) so that she can plan the agenda.

Availability of Review Materials

The draft document, Improving Science-Based Environmental Stakeholder Processes will be posted on the SAB website www.epa.gov/sab (under the DRAFT REPORTS heading) seven business days in advance of the meeting or will be available from Mrs. Pozun (see previous contact information, above). The earlier Science Advisory Board Commentary on the Role of Science in 'New Approaches' to Environmental Decision Making that Focuses on Stakeholder Involvement, EPA-SAB-EC-COM-00-002, October 7, 1999 is available on the SAB website <http://www.epa.gov/sab> (under the REPORTS heading and then the FISCAL YEAR 2000 REPORTS subheading).

II. Background

Under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), at the discretion of the Administrator, a Federal or State agency may be exempted from any provision of FIFRA if the Administrator determines that emergency conditions exist which require the exemption. The Texas Department of Agriculture has requested the Administrator to issue a specific exemption for the use of acetamiprid on cotton to control cotton aphid. Information in accordance with 40 CFR part 166 was submitted as part of this request.

As part of this request, the Applicant asserts that the state of Texas is likely to experience non-routine infestations of aphids during the 2000 cotton growing season. The cotton aphid, *Aphis gossypii* Glover, has infested cotton acreage in Texas since 1916. However, by 1989 aphids were more difficult to control since they had developed resistance to available pesticides. Since 1994 the Texas Department of Agriculture has been granted emergency exemptions for the use of carbofuran to control cotton aphid. They are now requesting the use of acetamiprid as well. The applicant claims that, without a specific exemption of FIFRA for the use of acetamiprid on cotton to control cotton aphids, cotton growers in the state will suffer significant economic losses.

The Applicant proposes to make no more than four applications of acetamiprid per season formulated as a flowable liquid containing 70% active ingredient (a.i.). A maximum of 0.2 pound of a.i. will be applied per season. The state proposes to treat up to 1.8 million acres of cotton in Texas. Applications will be made from March 1, 2001 to September 30, 2001. If all of the 1.8 million acres are treated with the maximum amount of acetamiprid proposed (0.2 pound a.i. per acre), then a maximum of 360,000 pound active ingredient would be applied.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 of FIFRA require publication of a notice of receipt of an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient) which has not been registered by the EPA. The notice provides an opportunity for public comment on the application.

The Agency, will review and consider all comments received during the comment period in determining whether to issue the specific emergency exemption requested by the Texas Department of Agriculture.
