

asbestos-related diseases among the residents, their health is at risk of being severely impaired by lack of essential screening and related medical treatment. Due to the urgency of the situation, HRSA cannot run a full or limited competition since this process would take approximately 290 days.

LCHD has been identified as uniquely qualified for undertaking this activity. LCHD has the requisite administrative and medical infrastructure as well as prior experience with screening and coordinating treatment with other local health care providers. In addition, tracking of disease incidents is a necessary component of the award activity and LCHD has previously worked with the Montana Department of Public Health and Human Services in developing and maintaining their asbestos-related disease registry. LCHD is in a unique position to immediately undertake and coordinate the award activities necessary to address this urgent public health problem and in a manner minimizing adverse health outcomes that might otherwise result from an extended delay in providing such services.
