Abstract: The Fish and Wildlife Act of 1956 (16 U.S.C. 742d) designates the Department of the Interior as a key agency responsible for the conservation and protection of wildlife and fisheries resources in the United States. This responsibility dictates that we gather accurate data on conservation efforts through means such as research to improve the development, management, and advancement of efforts. The Service's Science Applications and Migratory Bird Program in the Southeast Region is seeking to conduct a social network analysis to collect information regarding regional conservation efforts, conservation partnership goals, structure, and focal geography, and the connectedness of these efforts and partnerships. The proposed survey collects information necessary to address this gap in understanding and will serve to advance the Southeast Conservation Adaptation Strategy's (SECAS) leadership role as a regional forum and decision-support hub.

The proposed survey collects the following information:

- Familiarity and engagement with SECAS, including satisfaction with SECAS aspects and importance of SECAS indicators (Section 2);
- Organizational conservation priorities, including level of importance and usefulness of and reliance on SECAS resources (Section 3);
- Conservation partnerships, including identification of partner organizations and collaboration types (Section 4); and
- Organizational information, including type of organization and scope of work (Section 5).

The information collected in this effort will be used to develop multiple products aimed at translating the data into information that can strengthen partnerships, identify gaps, and inform conservation decisions.

The public may request a copy of the proposed survey instrument by sending a request to the Service Information Collection Clearance Officer (see **ADDRESSES**, above).
