Please refer to the instructions on the Commission's Web site under <http://www.ferc.gov/docs-filing/efiling.asp> and filing instructions in the Commission's Regulations at 18 CFR section 385.2001(a)(1)(iii). j. *Description of Project Facilities*: (1) A timber crib dam consisting of: (a) A 9-foot-high, 95-foot-long section with a crest elevation of 420.0 feet m.s.l.; and (b) a 12-foot-high, 145-foot-long section with a crest elevation of 419.2 feet m.s.l.; (2) a reservoir with a surface area of 19 acres, a storage capacity of 163 acre-feet, and a normal water surface elevation of 420.5 feet m.s.l.; (3) timber flashboards; (4) an intake structure; (5) a reinforced concrete and steel powerhouse containing four generating units with a capacity of 400 kW each and a 110 kW minimum flow generator at the base of the dam for a total installed capacity of 1,710 kW; (6) a 50-foot-long, 13.2 kilovolt transmission line; and (7) appurtenant facilities.

k. *Description of Proceeding*: The licensee is in violation of Article 17 of its license, issued April 22, 1987, which states in part: If the Licensee shall

abandon or discontinue good faith operation of the project or refuse or neglect to comply with the terms of the license and the lawful orders of the Commission, the Commission will deem it to be the intent of the Licensee to surrender the license.

Commission records indicate that the four main generating units stopped operating in 2004 and the fifth minimum flow-generating unit became inoperable in 2006. Additionally, severe floods occurring in June 2006 and April 2011 washed out the flashboards, causing debris damage, which the licensee has not repaired.

The Commission's Division of Dam Safety and Inspections last inspected the project on June 12, 2012. The inspection found that the licensee does not have plans to restore the non-operating generating units, but is committed to maintaining the dam in a safe condition. The licensee filed with the Commission a Dam Safety Surveillance and Monitoring Report on March 10, 2014. The report states that the licensee must seek approval from a bankruptcy court before receiving any funds for project repairs.
