Jennifer Skidmore and Carrie Hubard, (301) 427-8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The applicant proposes to import up to 20 samples annually from each of the following species: ringed seal (*Pusa hispida*), harbor seal (*Phoca vitulina*) and gray seal (*Halichoerus grypus*); and up to 40 samples annually from killer whales (*Orcinus orca*) from the Swedish Natural History Museums' collections (*i.e.*, collection of beached or accidentally killed animals). The applicant proposes to use stable isotope analysis of bone collagen to investigate the dietary ecology of grey wolves (*Canis lupus*) and killer whales over the past 100 years. By quantifying the contribution of seals to the diet of the predators, the research will study the energy flow between marine and terrestrial ecosystems and pressure on seal populations in Sweden. The permit would be valid for 3 years from the date of issuance.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.
