

Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 851-2908.

SUPPLEMENTARY INFORMATION:

Title: Requirements for Poultry and Hatching Eggs for Export.

OMB Number: 0579-0048.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA), among other things, collects information and conducts inspections to ensure that poultry and hatching eggs exported from the United States are free of communicable diseases.

The export of agricultural commodities, including poultry and hatching eggs, is a major business in the United States and contributes to a favorable balance of trade. Receiving countries have specific health requirements for poultry and hatching eggs exported from the United States. Most countries require a certification that our poultry and hatching eggs are free of diseases of concern to the receiving country. This certification generally must carry the USDA seal and be endorsed by an authorized APHIS veterinarian. In addition, APHIS requires owners and exporters of poultry and hatching eggs to provide health and identification information. Veterinary Services Form 17-6, Certificate for Poultry and Hatching Eggs for Export, is used to meet these requirements.

We are asking the Office of Management and Budget (OMB) to approve our use of this information collection activity for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection

technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.5 hours per response.

Respondents: Owners of poultry and hatching egg operations and exporters of poultry and hatching eggs.

Estimated annual number of respondents: 300.

Estimated annual number of responses per respondent: 34.

Estimated annual number of responses: 10,200.

Estimated total annual burden on respondents: 5,100 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 17th day of September 2013.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2013-0080]

Notice of Request for Approval of an Information Collection; National Animal Health Monitoring System; Cervid 2014 Study

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: New information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request approval of a new information collection for the National Animal Health Monitoring System's Cervid 2014 Study to support the farmed cervid industry in the United States.

DATES: We will consider all comments that we receive on or before November 22, 2013.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!documentDetail;D=APHIS-2013-0080-0001>.

- *Postal Mail/Commercial Delivery:*

Send your comment to Docket No. APHIS-2013-0080, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2013-0080> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the Cervid 2014 Study, contact Mr. Chris Quatrano, Industry Analyst, Centers for Epidemiology and Animal Health, VS, APHIS, 2150 Centre Avenue, Building B MS 2E7, Fort Collins, CO 80526; (970) 494-7207. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 851-2908.

SUPPLEMENTARY INFORMATION:

Title: National Animal Health Monitoring System; Cervid 2014 Study.

OMB Number: 0579-XXXX.

Type of Request: Approval of a new information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is authorized, among other things, to protect the health of U.S. livestock and poultry populations by preventing the introduction and interstate spread of serious diseases and pests of livestock and by eradicating such diseases from the United States when feasible. In connection with this mission, APHIS operates the National Animal Health Monitoring System (NAHMS), which collects nationally representative, statistically valid, and scientifically sound data on the prevalence and economic importance of livestock diseases and associated risk factors.

NAHMS' national studies are a collaborative industry and Government initiative to help determine the most effective means of preventing and controlling diseases of livestock. APHIS is the only agency responsible for collecting national data on livestock health.

APHIS plans to conduct a Cervid 2014 Study to obtain baseline information

about the cervid population and to provide a foundation for possible future studies. The objectives of the study are to:

- Provide a baseline description of the U.S. farmed-cervid industry, including inventory, species, operation size, and operation type;
- Describe current U.S. farmed-cervid production practices and challenges, including animal identification, fencing, animal care and handling, trade and movement, and disease testing;
- Describe the producer-reported occurrence of epizootic hemorrhagic disease (EHD) and the management and biosecurity practices important for controlling EHD on cervid farms; and
- Describe health management and biosecurity practices important for the control of infectious diseases on cervid farms.

The Cervid 2014 Study participants will be asked to complete and return a mail-in questionnaire. Non-respondents to the mailing will receive a follow-up telephone call and will be asked to complete the questionnaire over the telephone. Our predicted response rate is reflected in the estimated annual number of respondents and responses and the estimated total annual burden on respondents.

APHIS will use the information collected to describe current cervid health and management practices, help policymakers and industry make informed decisions, help researchers and private enterprise identify and focus on vital issues related to farmed-cervid health and productivity, facilitate the education of future producers and veterinarians, and conduct economic analyses of the health and production of the U.S. farmed-cervid industry.

We are asking the Office of Management and Budget (OMB) to approve our use of this information collection activity for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, through use, as

appropriate, of automated, electronic, mechanical, and other collection technologies, such as electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.50 hours per response.

Respondents: Cervid farm owners and operators.

Estimated annual number of respondents: 3,000.

Estimated annual number of responses per respondent: 1.

Estimated annual number of responses: 3,000.

Estimated total annual burden on respondents: 990 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 17th day of September 2013.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.
