- Fax: (202) 395-6974.

FOR FURTHER INFORMATION CONTACT: You may obtain copies of the proposed information collection, details regarding applying for this privately funded fellowship, and supporting documents from Alexander Zemek, Deputy Executive Director, U.S. National Commission for UNESCO, who may be reached at (202) 663-0026 or at zemekaf@state.gov.

SUPPLEMENTARY INFORMATION: We are soliciting public comments to permit the Department to:

- Evaluate whether the proposed information collection is necessary for the proper performance of our functions.

- Evaluate the accuracy of our estimate of the burden of the proposed collection, including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.

- Minimize the reporting burden on those who are to respond, including the

use of automated collection techniques or other forms of technology.

Abstract of proposed collection:

Fellowship applicants, U.S. citizen students at U.S. colleges and universities, will submit descriptions of self-designed proposals for brief travel abroad to conduct work that is consistent with UNESCO's substantive mandate to contribute to peace and security by promoting collaboration among nations through education, the sciences, culture, and communications in order to further universal respect for justice, for the rule of law and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations. The fellowship is funded through private donations. The information will be reviewed for the purpose of identifying the most meritorious proposals, as measured against the published evaluation criteria.

Methodology:

The U.S. Department of State, Bureau of International Organization Affairs, Office of UNESCO Affairs, Executive Secretariat U.S. National Commission for UNESCO (IO/UNESCO) will collect this information via electronic submission.

Dated: July 2, 2008.

Alexander F. Zemek,

Deputy Executive Director, U.S. National Commission for UNESCO, Bureau of International Organization Affairs, Department of State.

Notice of Policy; Amendments of the IACC Technical Specifications for the World Aeronautical Chart Series

AGENCY: Federal Aviation Administration (FAA), DOT.

SUMMARY: This notice announces amendments to the technical specification in the Interagency Air Cartographic Committee Specifications that address the depiction of man-made obstructions 500 feet or more above ground level (AGL) on the World Aeronautical Chart series.

DATES: This policy is effective on December 18, 2008.

FOR FURTHER INFORMATION CONTACT: George P. Sempeles, System Operations Airspace and Aeronautical Information Management, AJR–32, FAA, 800 Independence Ave., SW., Washington, DC 20591; telephone (202) 267–9290.

SUPPLEMENTARY INFORMATION:

Availability of Documents

You can get an electronic copy of this document using the Internet by—

1. Visiting the FAA’s Regulations and Policies Web page at http://www.faa.gov/regulations_policies/; or
2. Accessing the Government Printing Offices’ Web page at <http://www.gpoaccess.gov/fr/index.html>.

Background

The Interagency Air Cartographic Committee (IACC) is comprised of representatives of the Department of Defense and the FAA, who develop technical specifications for use in the preparation of the United States Government World Aeronautical Charts (WAC) and the Operational Navigation Charts.

The WAC provides a standard series of aeronautical charts covering land areas at a size and scale convenient for navigation by moderate-speed aircraft at high altitudes within the low altitude airspace structure. These charts are used for flight planning and in-flight navigation by VFR pilots on extended cross country flight. Because of their smaller scale, these charts do not depict as much detailed information as appears on the Sectional and Terminal Area Charts. WACs are not recommended for exclusive use by pilots of low speed, low altitude aircraft because certain information is not depicted.

Currently and in accordance with the IACC 3 specifications, obstructions exceeding 200 feet AGL in height (300 feet AGL in densely populated areas) are charted on the WAC, if the obstruction’s location is critical and space permits. Charting these low level obstructions provides limited value to pilots during cross country flight and adds to chart clutter reducing legibility. With the advancements in onboard navigational databases, the aviation community has requested that additional information be added to the WAC to support using these database systems

Policy Change

The FAA recognizes the need to incorporate new information on public aeronautical charts in support of technological advancements in air navigation techniques. The FAA also recognizes the need to reduce clutter on public aeronautical charts in order to maintain legibility while supporting the intended use of these products.

In reviewing industry’s request, the IACC concluded that the addition of this new information would increase congestion on the charts and that it is necessary to modify the technical specifications that require the charting
