

substances at the Bonita Peak Mining District Superfund Site located in San Juan County, Colorado ("BPMD Site"). The BPMD Site was placed on the National Priorities List on September 9, 2016. See 81 FR 62397, 62401 (Sept. 9, 2016). The United States alleged that SGC is liable under CERCLA as a current owner at the Site and as a past owner and operator at the time of a disposal of a hazardous substance at the Site, and that KGC is liable as the successor to Echo Bay Mines, Ltd., a past operator at the time of a disposal of a hazardous substance at the Site.

The proposed Consent Decree also resolves claims brought by SGC against the United States under CERCLA for recovery of response costs and contribution, and a claim for contribution and indemnity in connection with the BPMD Site. SGC alleged that the United States is liable under CERCLA as a current owner at the Site, as a previous owner at the Site at the time of disposal of hazardous substances, and as an operator and arranger at the Site, in part as a result of the U.S. Environmental Protection Agency's ("EPA's") response actions at the Gold King Mine. In addition, the proposed Consent Decree resolves the State of Colorado's potential claims against SGC and KGC under Section 107(a) of CERCLA, 42 U.S.C. 9607(a), for reimbursement of response costs incurred or to be incurred for response actions taken or to be taken by the State in connection with the release or threatened release of hazardous substances at the BPMD Site.

The proposed Consent Decree requires SGC and KGC to pay \$45 million to the United States and the State of Colorado for response costs in connection with the BPMD Site, and requires the United States to pay \$45 million to appropriate federal accounts for response costs. The proposed Consent Decree provides SGC and KGC and certain related parties (including Echo Bay, Inc., Kinross Gold USA, White Pine Gold Corporation, Echo Bay Management Corporation, and Echo Bay Exploration Inc.) with contribution protection under CERCLA and with covenants not to sue or take administrative action with regard to the Site under Sections 106, 107(a), and 113 of CERCLA; Sections 3008 and 7003 of the Resource Conservation and Recovery Act ("RCRA"); Sections 309 and 311 of the Clean Water Act; and certain Colorado statutory provisions. The proposed Consent Decree further terminates administrative orders issued to SGC related to Site access and investigation. Under the proposed consent decree, EPA, U.S. Department

of the Interior, and U.S. Department of Agriculture receive contribution protection and covenants not to sue with regard to the BPMD Site under Sections 106 and 107(a) of CERCLA and certain Colorado statutory provisions.

The proposed Consent Decree does not resolve all claims in the multidistrict litigation. For instance, it does not address claims brought by the State of New Mexico, Navajo Nation, or individual plaintiffs against the EPA related to the Gold King Mine.

MAP is a technical assistance program that offers museums an opportunity to strengthen operations and plan for the future through a process of self-assessment, institutional activities, and consultative peer review. MAP is supported through a cooperative agreement between IMLS and the American Alliance of Museums. Program participants choose from among five assessments: Organizational, Collections Stewardship, Community and Audience Engagement, Board Leadership, and Education and Interpretation. Those who complete the

assessment receive a report with prioritized recommendations reflecting the assessment type chosen. The forms submitted for public review include the MAP Application, the MAP Signatures Page, the MAP Follow-Up Visit Request Form, and five surveys addressing specific aspects of the assessment process, the materials used, the individual(s) serving as peer reviewers, and the impact one year after the assessment's conclusion. The application forms are used in participant selection and notification, and the surveys are designed to enhance understanding of where and how the program can be improved.
