

authorization again to allow time to continue working through landowner/agency issues and obtain the outstanding environmental permit to abandon the North Lake Pagie/Bay Junop-Bay Round pipeline. Texas Gas states that the Project's environmental findings remain valid as no agency has made any change, nor has any change occurred to the Project, that would affect the environment to an extent not already considered by the June 26 Order, by the Project's Environmental Assessment issued on June 13, 2018, or by the confirmed biological opinions of environmental agencies. Thus, Texas Gas believes it can come to agreeable terms for abandonment with the relevant landowner/agency parties and therefore asserts that 'good cause' exists to grant an extension of time, until June 26, 2023.

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on Transco's request for an extension of time may do so. No reply comments or answers will be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10).²

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for Natural Gas Act facilities when such requests are contested before order issuance. For those extension requests that are contested,³ the Commission will aim to issue an order acting on the request within 45 days.⁴ The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.⁵ The Commission will not consider arguments that re-litigate the issuance of the Order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied

with the National Environmental Policy Act.⁶ At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.⁷ The OEP Director, or his or her designee, will act on those extension requests that are uncontested.
