

action” alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The action does not involve the use of any different resources than those previously considered in the Final Environmental Statement for OCNCS, dated December 1974, published by the Atomic Energy Commission.

Agencies and Persons Consulted

In accordance with its policy, on December 16, 2004, the NRC staff consulted with the New Jersey State official, Mr. Richard Pinney, of the New Jersey Department of Environmental Protection, Bureau of Nuclear Engineering, regarding the environmental impact of the proposed action. During the consultation, the NRC staff acknowledged a September 23, 2004, letter from Mr. Bradley Campbell, Commissioner of the State of New Jersey Department of Environmental Protection, which opposed the exemption. The NRC staff responded by letter dated November 2, 2004. No environmental concerns were raised by the September 23, 2004 letter. During the consultation, the State official had no additional comments regarding the environmental aspects of the exemption.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action. However, a site specific supplement to the “Generic Environmental Impact Statement for License Renewal of Nuclear Plants (NUREG-1437)” will be required for the license renewal application submitted under this exemption.

For further details with respect to the proposed action, see the licensee’s letter dated August 10, 2004. Documents may be examined, and/or copied for a fee, at the NRC’s Public Document Room (PDR), located at One White Flint North, Public File Area O1F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to

ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1-800-397-4209 or (301) 415-4737, or by e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 16th day of December 2004.

For the Nuclear Regulatory Commission.

Peter S. Tam,

Senior Project Manager, Section 1, Project Directorate I, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.
