Title: Track Safety Standards: Concrete Crossties.

OMB Control Number: 2130–0592.

Abstract: On April 1, 2011, FRA amended the Federal Track Safety Standards to promote the safety of railroad operations over track

constructed with concrete crossties. In particular, FRA mandated specific requirements for effective concrete crossties, for rail fastening systems connected to concrete crossties, and for automated inspections of track constructed with concrete crossties. The information collected under § 213.234 is used by FRA to ensure that automated track inspections of track constructed with concrete crossties are carried out as specified in this section to supplement

visual inspections by Class I and Class II railroads, intercity passenger railroads, and commuter railroads or small government jurisdictions that serve populations greater than 50,000.
