Abstract: Discharge Monitoring

Report-Quality Assurance (DMR-QA) study program participation is mandatory for major and selected minor National Pollution Discharge Elimination System (NPDES) permit holders in accordance with Clean Water Act Section 308. The DMR-QA study program is designed to evaluate the analytic ability of the laboratories that perform chemical, microbiological and whole effluent toxicity (WET) analyses required in the NPDES permits for reporting results in the Discharge Monitoring Reports (DMR). Under DMR-QA, the permit holder is responsible for having their in-house and/or contract laboratories perform proficiency tests and submit results for grading by proficiency test (PT) providers. Graded results are transmitted by either the permittee or PT provider to the appropriate federal or state NPDES regulatory authority. Permit holders are responsible for submitting corrective action reports to the appropriate regulatory authority.

Form Numbers: EPA Form 6400-01.

Respondents/affected entities: Major and selected minor permit holders under the Clean Water Act's National Pollution Discharge Elimination System (NPDES).

Respondent's obligation to respond: Mandatory under Clean Water Act Section 308(a).

Estimated number of respondents: 5,509 (total).

Frequency of response: Major permit holders must participate annually. Minor permit holders must participate if selected by the state or EPA DMR-QA coordinator.

Total estimated burden: 36,361 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$4,176,263 (per year), includes \$2,376,638 annualized capital or operation & maintenance costs.

Changes in Estimates: There is a decrease of 5,150 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease in burden hours can be attributed to a number of states obtaining full or partial waivers from this activity through agreements with the EPA. Labor costs were revised upward to take into account employee benefit compensation costs and inflation. Non-labor costs for obtaining proficiency test samples increased

because of an update to the list of most commonly used analytes, and due to inflation.
