

utilization of Code Cases N-588 and N-641 would provide an adequate margin of safety against brittle failure of the Turkey Point reactor vessels.

The proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released off site, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not involve any historic sites. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (that is, the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for the Turkey Point Plant, Units 3 and 4.

Agencies and Persons Consulted

In accordance with its stated policy, on October 10, 2000, the staff consulted with the Florida State official, William A. Passetti of the Bureau of Radiation Control, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated July 7, 2000, as supplemented October 4, 2000. Documents may be

examined, and/or copied for a fee, at the NRC's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Adams Public Library component on the NRC Web site, <http://www.nrc.gov> (the Electronic Reading Room).

SUPPLEMENTARY INFORMATION: Section 4007 of Title IV of the Employee Retirement Income Security Act of 1974 ("ERISA") requires the Pension Benefit Guaranty Corporation ("PBGC") to collect premiums from pension plans covered under Title IV pension insurance programs. Pursuant to ERISA section 4007, the PBGC has issued its regulation on Payment of Premiums (29 CFR Part 4007). Section 4007.3 of the premium payment regulation requires plans, in connection with the payment of premiums, to file certain forms prescribed by the PBGC, and § 4007.10 requires plans to retain and make available to the PBGC records supporting or validating the computation of premiums paid.

The forms prescribed are PBGC Form 1-ES and Form 1 and (for single-employer plans only) Schedule A to Form 1. Form 1-ES is issued, with instructions, in the PBGC's Estimated Premium Payment Package. Form 1 and Schedule A are issued, with instructions, in the PBGC's Annual Premium Payment Package.

The premium forms are needed to determine the amount and record the payment of PBGC premiums, and the submission of forms and retention and submission of records are needed to enable the PBGC to perform premium audits. The plan administrator of each pension plan covered by Title IV of ERISA is required to file one or more of the premium payment forms each year. The PBGC uses the information on the premium payment forms to identify the plans paying premiums and to verify whether plans are paying the correct amounts. That information and the retained records are used for audit purposes.

In addition, section 4011 of ERISA and the PBGC's regulation on Disclosure to Participants (29 CFR Part 4011) require plan administrators of certain underfunded single-employer pension

plans to provide an annual notice to plan participants and beneficiaries of the plans' funding status and the limits on the Pension Benefit Guaranty Corporation's guarantee of plan benefits. The participant notice requirement only applies (subject to certain exemptions) to plans that must pay a variable rate premium. In order to monitor compliance with Part 4011, plan administrators must indicate on Schedule A to Form 1 that the participant notice requirements have been complied with.

The collection of information under the regulation on Payment of Premiums, including Form 1-ES, Form 1, and Schedule A to Form 1, and related instructions has been approved by OMB under control number 1212-0009 through December 31, 2000. This collection of information also includes the certification of compliance with the participant notice requirements (but not the participant notices themselves). The PBGC is requesting that OMB extend its approval of this collection of information for another three years. (The participant notices constitute a different collection of information that has been separately approved by OMB.)

The PBGC estimates that it receives responses annually from about 39,400 plan administrators and that the total annual burden of the collection of information is about 2,482 hours and \$9,431,600.

Issued in Washington, DC, this 19th day of October, 2000.

C. David Gustafson,

Acting Director, Corporate Policy and Research Department, Pension Benefit Guaranty Corporation.
