DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Extension

AGENCY: U.S. Energy Information Administration (EIA), U.S. Department of Energy (DOE).

ACTION: Notice.

SUMMARY: EIA submitted an information collection request for extension as required by the Paperwork Reduction Act of 1995. The information collection requests a three-year extension, with change, of its Form EIA-111 *Quarterly Electricity Imports and Exports Report*, OMB Control Number 1905-0208. Form EIA-111 collects information on U.S. imports and exports of electricity. Data are used to obtain estimates on the flows of electricity into and out of the United States.

DATES: Comments on this information collection must be received no later than July 29, 2024. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open

for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Glenn McGrath at (202) 586-4325 or by email at Glenn.Mcgrath@eia.gov. The form and instructions are available at <https://www.eia.gov/survey/changes/electricity/>.

SUPPLEMENTARY INFORMATION: This information collection request contains:

(1) OMB No.: 1905-0208;

(2) *Information Collection Request Title:* Quarterly Electricity Imports and Exports Report;

(3) *Type of Request:* Three-year extension with change;

(4) *Purpose:* Form EIA-111 collects U.S. electricity import and export data on a quarterly basis. The data are used to measure the flow of electricity into and out of the United States. The import and export data are reported by U.S. purchasers, sellers and transmitters of wholesale electricity, including persons authorized by Order to export electric energy from the United States to foreign countries, persons authorized by Presidential Permit to construct, operate, maintain, or connect electric power transmission lines that cross the U.S. international border, and U.S. Balancing Authorities that are directly interconnected with foreign Balancing Authorities. Such entities report monthly flows of electric energy received or delivered across the border, the cost associated with the transactions, and actual and implemented interchange.

(4a) *Proposed Changes to Information Collection:* There is a reduction in the number of survey respondents required to file EIA-111 reports. This reduces the annual estimated responses and associated burden hours. There is no change to the content collected on the EIA-111.

(5) *Annual Estimated Number of Respondents:* 153;

(6) *Annual Estimated Number of Total Responses:* 612;

(7) *Annual Estimated Number of Burden Hours:* 918;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* \$83,685 (918 burden hours times \$91.16 per hour). EIA estimates that respondents will have no additional costs associated with the surveys other than the burden hours and the maintenance of the information as part of the normal course of business.

Comments are invited on whether or not: (a) The proposed collection of information is necessary for the proper performance of agency functions, including whether the information will have a practical utility; (b) EIA's

estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used, is accurate; (c) EIA can improve the quality, utility, and clarity of the information it will collect; and (d) EIA can minimize the burden of the collection of information on respondents, such as automated collection techniques or other forms of information technology.

AGENCY: Western Area Power Administration, Department of Energy (DOE).

ACTION: Notice of proposed firm power service and sale of surplus products formula rates.

SUMMARY: The Upper Great Plains (UGP) region of the Western Area Power Administration (WAPA) proposes revised formula rates for the Pick-Sloan Missouri Basin Program (P-SMBP)—Eastern Division (ED) firm power, firm peaking power service, and sale of surplus products. The existing formula rates for these services, under Rate Schedules P-SED-F14 and P-SED-FP14, and sale of surplus products, under formula rate schedule P-SED-M2, do not expire until December 31, 2027; however, the existing firm power and firm peaking power service rates no longer provide sufficient revenue to recover interest expense and repay investments. The formula rate for sale of surplus products is not changing but is being included in Rate Order No. WAPA-213 (WAPA-213) in order to make these rate schedules effective for the same time frame.

DATES: A consultation and comment period will begin June 28, 2024 and end August 27, 2024. Due to not receiving final Fiscal Year (FY) 2023 financial data until late January, holding subsequent rate impact discussions with customers between February and April, and the subsequent time frame required
