

NATIONAL SCIENCE FOUNDATION**Agency Information Collection
Activities: Comment Request****AGENCY:** National Science Foundation.**ACTION:** Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. This is the second notice for public comment; the first was published in the *Federal Register* at 79 FR 69883, and no comments were received. NSF is forwarding the proposed renewal submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice. The full submission may be found at: <http://www.reginfo.gov/public/do/PRAMain>.

Comments: Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science Foundation, 725–17th Street NW., Room 10235, Washington, DC 20503, and to Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 1265, Arlington, Virginia 22230 or send email to splimpto@nsf.gov. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703–292–7556.

It is not permissible for NSF to conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information

unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:*Title:* Survey of Earned Doctorates.*OMB Control Number:* 3145–0019.

Summary of Collection: The authority to collect information for the Survey of Earned Doctorates (SED) is established under the National Science Foundation Act of 1950, as amended, Public Law 507 (42 U.S.C. 1862), Section 3(a) (6), which directs the NSF “. . . to provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formation by other agencies of the federal government.” More recently, the National Center for Science and Engineering Statistics (NCSES) was established within NSF by Section 505 of the America COMPETES Reauthorization Act of 2010 and given a broader mandate to collect data related to STEM education, the science and engineering workforce, and U.S. competitiveness in science, engineering, technology, and R&D. The SED is part of an integrated survey system that fulfills the education and workforce components of this mission.

The SED has been conducted annually since 1958 and is jointly sponsored by six Federal agencies (NSF, National Institutes of Health, U.S. Department of Education, U.S. Department of Agriculture, National Endowment for the Humanities, and National Aeronautics and Space Administration) in order to avoid duplication of effort in collecting such data. It is an accurate, timely source of information on an important national resource—highly educated individuals. Data are obtained via Web survey or paper questionnaire from each person earning a research doctorate at the time they receive the degree. Graduate schools help distribute the SED to their graduating doctorate recipients. Data are collected on the doctorate recipient's field of specialty, educational background, sources of financial support in graduate school, debt level, postgraduation plans for employment, and demographic characteristics.

The survey will be collected in conformance with the National Science Foundation Act of 1950, as amended, and the Privacy Act of 1974. Responses from individuals are voluntary. NSF will ensure that all individually identifiable information collected will be kept strictly confidential and will be used for research or statistical purposes, analyzing data, and preparing scientific reports and articles.

Need and Use of the Information: The Federal government, universities, researchers, and others use the information extensively. NSF, as the lead agency, publishes statistics from the survey in several reports, but primarily in the annual publication series, “Doctorate Recipients from U.S. Universities.” These reports are available on the Web. NSF uses this information to prepare congressionally mandated reports such as *Science and Engineering Indicators* and *Women, Minorities and Persons with Disabilities in Science and Engineering*.

Description of Respondents:

Individuals.

Number of Respondents: 52,000.*Frequency of Responses:* Annually.*Total Burden Hours:* 28,800.

Dated: March 19, 2015.

Suzanne H. Plimpton,*Reports Clearance Officer, National Science Foundation.*

BILLING CODE 7555–01–P**NUCLEAR REGULATORY
COMMISSION****[Docket No. 50–313; NRC–2015–0069]****Entergy Operations, Inc., Arkansas
Nuclear One, Unit 1****AGENCY:** Nuclear Regulatory Commission.**ACTION:** Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an exemption in response to a March 20, 2014, request from Entergy Operations, Inc. (Entergy or the licensee), from the requirements to use Charpy V-notch (C_V) and drop weight-based methodology to determine initial nil-ductility reference temperature (RT_{NDT}) for use in evaluating the integrity of Linde 80 weld materials in the reactor pressure vessel (RPV) beltline at Arkansas Nuclear One (ANO), Unit 1. This exemption would allow the licensee to use an alternate methodology to incorporate fracture toughness test data to determine RT_{NDT} values for use in the evaluation of the RPV beltline weld material integrity in support of the development of updated pressure-temperature limit curves.

DATES: March 24, 2015.
