

changes in ventilation which affect the main air current or any split thereof and which adversely affect the safety of persons in the mine will only be made when the mine is idle. Petitioner states that it is not possible to comply with both 30 CFR 57.4760(a) and 57.22214(a) at the Tata mine because the closure of one or more control doors in the event of a fire would certainly affect the main air currents and splits in such a way as to endanger the safety of persons working underground. Under 30 CFR 57.22214(a), such a ventilation change can only be carried out when the mine is idled with no miners underground. Compliance with 30 CFR 57.4760(a) via closure of a control door would not only endanger miners but would also be in violation of 30 CFR 57.22214(a).

6. 30 CFR 57.4760(a) does not take into account the complexities involved with suddenly restricting airflow in mines that have multiple shafts, multiple fan installations, and methane liberation. Petitioner noted that Part 75, which regulates underground coal mines, does not have any requirements that are equivalent to 30 CFR 57.4760 requirements for air control doors or alternative ventilation measures for the bottom, or near the bottom of coal mine intake shafts. The ventilation requirements applicable to Class III mines were specifically tailored to suit the conditions in a gassy trona mine like the Tata mine. Petitioner strongly contends that miners are already afforded adequate and equivalent protection via compliance with the fire prevention and control, and the ventilation requirements applicable to Class III mines. Mine rescue rules and basic ventilation flow principles dictate what changes in ventilation should be made in emergency situations, including a fire. Petitioner has a refuge and evacuation procedure set forth in the Mine's Emergency Response Plan. When a fire is detected underground, the mine's Emergency Response Plan is immediately implemented, and miners are trained on how to evacuate in a safe and swift manner depending on the location of the ignition. The mine maintains three designated separate escapeways which reduces the likelihood of miners having to travel through or past smoke or toxic gasses.

The petitioner asserts that compliance with the existing standard results in a diminution of safety to the miners at the Tata Mine.

Dated: July 2, 2015.

Sheila McConnell,

Acting Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4510-43-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Brookwood-Sago Mine Safety Grants; Correction

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice; correction.

SUMMARY: On June 29, 2015, the Mine Safety and Health Administration (MSHA) announced in the **Federal Register** the availability of grant funds for education and training programs to help identify, avoid, and prevent unsafe working conditions in and around mines. 80 FR 37017. The document included an incorrect date.

FOR FURTHER INFORMATION CONTACT:

Janice Oates at Oates.Janice@dol.gov or 202-693-9573 or Teresa Rivera at Rivera.Teresa@dol.gov or 202-693-9581.

Correction

In the **Federal Register** of June 29, 2015, 80 FR 37017, on page 37021, in the first column, correct the "Submission Date, Times, and Addresses" in paragraph D to read:

The closing date for applications will be August 29, 2015 (no later than 11:59 p.m. EDT). MSHA will award grants on or before September 30, 2015.

Grant applications must be submitted electronically through the Grants.gov Web site. The Grants.gov site provides all the information about submitting an application electronically through the site as well as the hours of operation. Interested parties can locate the downloadable application package by the CFDA No. 17.603.

Dated: July 2, 2015.

Patricia W. Silvey,

Deputy Assistant Secretary for Operations, Mine Safety and Health.

BILLING CODE 4510-43-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 052-00027 and 052-00028; NRC-2008-0441]

Virgil C. Summer Nuclear Station, Units 2 and 3

AGENCY: Nuclear Regulatory Commission.

ACTION: License amendment application; opportunity to comment, request a hearing, and petition for leave to intervene.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an amendment to Combined Licenses (NPF-93 and NPF-94), issued to South Carolina Electric and Gas (SCE&G) and South Carolina Public Service Authority (Santee Cooper) (the licensee), for construction and operation of the Virgil C. Summer Nuclear Station (VCSNS), Units 2 and 3 located in Fairfield County, South Carolina.

The proposed amendment departs from Tier 2* and associated Tier 2 information in the VCSNS Units 2 and 3 Updated Final Safety Analysis Report (UFSAR) (which includes the plant specific Design Control Document Tier 2 information) to revise the application of welding codes. An individual **Federal Register** notice was published on June 8, 2015, providing an opportunity to comment, request a hearing, and petition for leave to intervene for a License Amendment Request (LAR) for the VCSNS combined licenses. The licensee has submitted a revision to the original LAR, dated May 26, 2015. This new revision increases the scope of the original LAR.

DATES: Submit comments by August 10, 2015. Requests for a hearing or petition for leave to intervene must be filed by August 10, 2015.

ADDRESSES: You may submit comments by any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2008-0441. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: OWFN-12-H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.
