General information concerning the BOSC can be found at the following website: <https://www.epa.gov/bosc>.

SUPPLEMENTARY INFORMATION:

Background

The BOSC is a chartered Federal Advisory Committee established by the EPA to provide independent scientific and technical peer review, advice, consultation, and recommendations about ORD. As a Federal Advisory Committee, the BOSC conducts business in accordance with the Federal Advisory Committee Act (FACA) (5 U.S.C. app. 2) and related regulations. The BOSC is comprised of an Executive Committee and two supporting subcommittee(s): Social and Community Science, and Climate Change. Please visit <https://www.epa.gov/aboutepa/about-office-research-and-development-ord> to learn more about ORD's research programs. Members of the BOSC constitute a distinguished body of non-EPA scientists, engineers, and economists who are experts in their respective fields. The chartered BOSC provides scientific advice to the EPA Administrator on a variety of EPA science and research topics. All the work of BOSC standing committees and ad-hoc panels is conducted under the auspices of the chartered BOSC. The chartered BOSC executive committee review all BOSC standing committee and ad-hoc panel draft reports and determine whether each meets the BOSC's criteria and high-quality standards required to deliver them to the EPA Administrator.

The BOSC will evaluate ORD's draft report on a case study that uses value of information (VOI) analysis to weigh the public health and economic trade-offs associated with the timeliness, uncertainty, and costs of the draft EPA Transcriptomic Assessment Product (ETAP). The ETAP is a proposed ORD assessment product that utilizes a standardized short-term *in vivo* study design and data analysis procedures to develop transcriptomic-based toxicity values for data poor chemicals. The draft report will be provided in the BOSC docket prior to the meeting and will present an in-depth comparison of the ETAP with traditional toxicity testing and human health assessment processes across different chemical exposure scenarios, health endpoint

valuations, exposure mitigation costs, and decision contexts. The review of the draft report on the VOI case study by the BOSC is being performed in close coordination with a separate BOSC review of the underlying scientific studies supporting development and implementation of the ETAP.

Expertise Sought

The EPA invites nominations of individuals to serve as SGEs with expertise or extensive experience in the following scientific disciplines and topic areas as they relate to human health and the environment:

- Decision analysis, including value of information
- Human health chemical risk assessment
- Toxicology
- Exposure science, including computational exposure modeling
- Statistics, including Bayesian methods
- Health economics
- Transcriptomics, including dose response modeling of transcriptomic data

Selection Criteria

Nominations will be evaluated on the basis of several criteria including: (a) demonstrated scientific and/or technical credentials and disciplinary expertise, knowledge, and experience in relevant fields; (b) availability to serve and willingness to commit time to the committee (approximately one to three meetings per year both by teleconferences and possibly face-to-face meetings); (c) absence of financial conflicts of interest; (d) absence of an appearance of a lack of impartiality; (e) demonstrated ability to work constructively and effectively on committees; and (f) background and experiences that would contribute to the diversity of viewpoints, e.g., workforce sector, geographical location, social, cultural, and educational backgrounds, and professional affiliations.

Process and Deadline for Submitting Nominations

Any interested person or organization may nominate qualified persons to be considered for appointment as an SGE. Nominations should be submitted via the BOSC website at: <https://www.epa.gov/bosc>. Nominations should be submitted no later than March 3, 2023. To receive full consideration, nominations should include all the information requested. EPA's nomination form requests: contact information about the person making the nomination; contact information about the nominee; the disciplinary and

specific areas of expertise of the nominee; the nominee's curriculum vita and/or resume; and additional information that would be useful for considering the nomination such as background and qualifications (e.g., current position, educational background, expertise, research areas), experience relevant to one or more of ORD's research programs, service on other advisory committees and professional societies, and availability to participate as an SGE. Persons having questions about the nomination procedures, or who are unable to submit nominations through the BOSC website, should contact Mr. Tom Tracy, as indicated above under **FOR FURTHER INFORMATION CONTACT** section of this notice.

Mary Ross,

Director, Office of Science Advisor, Policy and Engagement.

A. Written Comments

Submit your comments, identified by Docket ID No. EPA–HQ–OLEM–2022–0967 at <https://www.regulations.gov> (our preferred method), or the other methods identified in the **ADDRESSES** section. Once submitted, comments cannot be edited or removed from the docket. The EPA may publish any comment received to its public docket. Do not submit to EPA’s docket at <https://www.regulations.gov> any information you consider to be Proprietary Business Information (PBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about PBI or multimedia

submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>.

II. Background

Section 260.30(c) allows the EPA Administrator to determine on a case-by-case basis that materials that have been reclaimed but must be further reclaimed before the materials are fully recovered are not solid wastes. The effect of a variance from the classification of solid waste is to exempt the material from RCRA hazardous waste regulations. The EPA’s proposal responds to a petition submitted by HVF on July 26, 2022 (HVF’s Petition). HVF’s Petition concerns two partially-reclaimed materials (“Solution Sweeps” and “Filter Sweeps”) produced at its Tucson, Arizona facility from precious metal-bearing waste from cyanide-based electroplating operations. As explained in the “Statement of Basis” available in the docket [Docket ID EPA–HQ–OLEM–2022–0967–0001], EPA’s preliminary determination is that the two materials produced by HVF are “commodity-like” under the criteria listed in § 260.31(c) and are legitimately recycled, thus qualifying for variances from classification as solid waste under § 260.30(c). The EPA seeks comment on the environmental justice impacts of this proposed variance.

For information on The EPA’s rationale for granting the petition, see the attached “Statement of Basis” available in the docket [Docket ID EPA–HQ–OLEM–2022–0967–0001].

Michael S. Regan,
Administrator.
