Columbia Gas states that the new point of delivery will consist of installing a tap and a valve and that the estimated quantity of natural gas to be delivered at the new delivery point is 3,600 dekatherms per day. Columbia Gas declares that the estimated cost of construction is \$20,890. Columbia Gas states that service is currently being provided by Ohio Cumberland Gas Company (Ohio Cumberland). Columbia Gas asserts that Ohio Cumberland has waived its rights to continue providing the service.

Columbia Gas states that the quantities of natural gas to be provided through the new point of delivery will be within Columbia Gas's authorized level of services. Columbia Gas asserts there is no impact on their existing design day and annual obligations to the customers as a result of the construction and operation of the new delivery point for firm transportation service.
