Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number.

The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

Nature and Extent of Confidentiality:

These outage reports filed with the Commission pursuant to part 4 are presumed confidential. The information in these filings may be shared with the Department of Homeland Security only under appropriate confidential disclosure protections. Other persons seeking disclosure must follow the procedures delineated in 47 CFR 0.457 and 0.459 of the Commission's rules for requests for and disclosure of information. The Commission recently adopted rule revisions, scheduled to take effect on September 30, 2022, that would expand this sharing to participating agencies of the 50 states, the District of Columbia, tribal nations, territories, and other agencies of federal government that have official duties that make them directly responsible for emergency management and first responder support functions. *See In the Matter of Amendments to Part 4 of the Commission's Rules Concerning Disruptions to Communications*, Second Report and Order, FCC 21–34 (2021).

Needs and Uses: This information collection pertains to a *Report and Order* adopted by the Commission in 2016 and modified in part by an *Order on Reconsideration* adopted by the Commission in 2019. The *Report and Order* adopted final rules requiring submarine cable licensees to report service outages through the network outage reporting system (NORS). The *Order on Reconsideration* modified the *Report and Order* by reexamining and amending certain aspects of the required reporting to better conform the requirements to how the Commission expects to use the outage information. Specifically, these licensees will need to report specific unplanned outages greater than 30 minutes on a portion of the cable system between submarine line terminal equipment (SLTE) or greater than four hours when it affects a fiber pair.

Submarine cables are the conduit for the vast majority of voice, data, and internet connectivity between the mainland United States and Alaska, Hawaii, Guam, American Samoa, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands, as well as the connectivity between the United States and the rest of the world.

Accordingly, the operation and maintenance of the undersea cables licensed in the United States are essential to the nation's economic stability, national security and other vital public interests. As with other information collection using NORS (under OMB Control No. 3060-0484), this newly approved collection will facilitate FCC monitoring, analysis, and investigation of the reliability and security of submarine cable networks, and to identify and take action on potential threats to our Nation's telecommunications infrastructure.

RIN 1018–BF08

Migratory Bird Subsistence Harvest in Alaska; Harvest Regulations for Migratory Birds in Alaska During the 2021 Season; Correction

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule; correction.

SUMMARY: The U.S. Fish and Wildlife Service recently issued a final rule that revised the migratory bird subsistence harvest regulations in Alaska. The final rule included an improperly worded

amendatory instruction that resulted in the unintentional removal of regulatory text. This document corrects that inadvertent error and restores the regulations to their proper wording.

DATES: This correction is effective April 28, 2021.

ADDRESSES: You may find the rulemaking action at the Federal eRulemaking Portal: <http://www.regulations.gov> in Docket No. FWS–R7–MB–2020–0134.

SUPPLEMENTARY INFORMATION: On April 19, 2021, we published a final rule (86 FR 20311) that was effective upon publication and that revised certain regulations in title 50 of the Code of Federal Regulations (CFR) in part 92. The amendatory instructions to the Office of the Federal Register (OFR) for the revisions to § 92.31 included an instruction to revise paragraph (e); however, the instruction should have been to revise the introductory text of paragraph (e). By instructing OFR to revise paragraph (e) to read as set forth in the rule, we inadvertently instructed OFR to replace all of paragraph (e), which at the time of publication of the April 19, 2021, rule included subparagraphs (e)(1) and (2), with the text set forth in the rule. However, we did not mean to remove paragraphs (e)(1) and (2) from the CFR; our intention was only to revise the introductory text of paragraph (e).

Accordingly, this rule corrects our inadvertent error by adding paragraphs (e)(1) and (2) back to § 92.31.

Administrative Procedure

We have determined, pursuant to 5 U.S.C. 553(b)(3)(B), that prior notice and opportunity for public comment are impractical and unnecessary. Public comment could not inform this correction process in any meaningful way. We have further determined that, under 5 U.S.C. 553(d)(3), the agency has good cause to make this rule effective upon publication, as it is important for the proper administration of our programs for our regulations in the CFR to be completely and correctly worded.
