Title: Inspection and Testing of Meter Provers.

OMB Control Number: 2137–0620.

Summary: This information collection and recordkeeping burden results from the requirements pertaining to the use, inspection, and maintenance of mechanical displacement meter provers (meter provers) used to check the accurate flow of liquid hazardous materials into bulk packagings, such as portable tanks and cargo tank motor vehicles, under the HMR. These meter provers are used to ensure that the proper amount of liquid hazardous

materials is being loaded and unloaded. These meter provers consist of a gauge and several pipes that always contain small amounts of the liquid hazardous material in the pipes as residual material and, therefore, must be inspected and maintained in accordance with the HMR to ensure they are in proper calibration and working order. These meter provers are not subject to the specification testing and inspection requirements in 49 CFR part 178. However, these meter provers must be visually annually inspected and hydrostatic pressure tested every five years in order to ensure they are properly working as specified in 49 CFR 173.5a of the HMR. Therefore, this information collection requires that:

(1) Each meter prover must undergo and pass an annual external visual inspection to ensure that the meter provers used in the flow of liquid hazardous materials into bulk

packagings are accurate and in conformance with the performance standards in the HMR.

(2) Each meter prover must undergo and pass a hydrostatic pressure test at least every 5 years to ensure that the meter provers used in the flow of liquid hazardous materials into bulk packagings are accurate and in conformance with the performance standards in the HMR.

(3) Each meter prover must successfully complete the test and inspection and must be marked in accordance with 49 CFR 180.415(b) and 173.5a.

(4) Each owner must retain a record of the most recent visual inspection and pressure test until the meter prover is requalified.

The following information collections and their burdens are associated with this OMB Control Number:

Information collection	Respondents	Total annual responses	Hours per response	Total annual burden hours
Annual Visual Inspection	250	250	0.5	125
Hydrostatic Pressure Test (Every 5 Years)	250	250	0.2	50

Affected Public: Owners of meter provers used to measure liquid hazardous materials flow into bulk packagings such as cargo tanks and portable tanks.

Annual Reporting and Recordkeeping Burden:

Number of Respondents: 500.

Total Annual Responses: 500.

Total Annual Burden Hours: 175.

Frequency of Collection: On occasion.

Issued in Washington, DC, on June 14, 2023.
