DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Intent To Prepare an Environmental Impact Statement/ Environmental Impact Report for the Habitat Conservation Plan for the Occidental of Elk Hills, Inc., Elk Hills Oil and Gas Field, Kern County, CA

AGENCY: Fish and Wildlife Service,
Interior.

ACTION: Notice of intent.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA), we, the Fish and Wildlife Service (Service), are issuing this notice to advise the public that we intend to gather information necessary to prepare, in coordination with the California Department of Fish and Game (DFG) and Occidental of Elk Hills, Inc. (OEHI), a joint Environmental Impact Statement/Environmental Impact Report (EIS/EIR) on the Habitat Conservation Plan for the Elk Hills Oil and Gas field (Plan).

OEHI intends to apply for a 50-year Endangered Species Act (ESA) Section 10 incidental take permit from the Service. The permit is needed to authorize the incidental take of threatened and endangered species that could occur as a result of future operations of the Elk Hills Oil and Gas Field.

The Service provides this notice to (1) describe the proposed action and possible alternatives; (2) advise other Federal and State agencies, affected Tribes, and the public of our intent to prepare an EIS/EIR; (3) announce the initiation of a public scoping period; and (4) obtain suggestions and information on the scope of issues to be included in the EIS/EIR.

DATES: Written comments should be received on or before December 28, 2006.

ADDRESSES: Written comments should be submitted to Lori Rinek, Chief, Conservation Planning and Recovery Division, Fish and Wildlife Service, Sacramento Fish and Wildlife Office, 2800 Cottage Way, W-2605, Sacramento, California 95825. Comments may also be sent by facsimile to 916-414-6713.

FOR FURTHER INFORMATION CONTACT: Joseph Terry, Fish and Wildlife Biologist, or Lori Rinek, Chief, Conservation Planning and Recovery Division, Sacramento Fish and Wildlife

Office, at 916-414-6600 [see **ADDRESSES**].

SUPPLEMENTARY INFORMATION:

Reasonable Accommodation

Persons needing reasonable accommodations in order to attend and participate in the public meeting should contact Lori Rinek at 916-414-6600 as soon as possible. In order to allow sufficient time to process requests, please call no later than one week before the public meeting. Information regarding this proposed action is available in alternative formats upon request.

Background

Section 9 of the ESA and Federal regulations prohibit the "take" of wildlife species listed as endangered or threatened (16 U.S.C. 1538). The ESA defines the term "take" as: to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect listed species, or to attempt to engage in such conduct (16 U.S.C. 1532). Harm includes significant habitat modification or degradation that actually kills or injures listed wildlife by significantly impairing essential behavioral patterns, including breeding, feeding, and sheltering [50 CFR 17.3(c)]. Pursuant to section 10(a)(1)(B) of the ESA, the Service may issue an "incidental take permit" to take listed species if such taking is incidental to, and not the purpose of, otherwise lawful activities. Regulations governing permits for threatened species and endangered species, respectively, area at 50 CFR 17.32 and 50 CFR 17.22.

Although take of listed plant species is not prohibited under the ESA, and therefore cannot be authorized under an incidental take permit, plant species may be included on a permit in recognition of the conservation benefits provided to them under a habitat conservation plan. All species included on an incidental take permit would receive assurances under the FWS' "No Surprises" regulation [50 CFR 17.22(b)(5) and 17.32(b)(5)].

Species proposed for coverage in the HCP are species that are currently listed as federally threatened or endangered or have the potential to become listed during the life of this HCP and have some likelihood to occur within the project area. Should unlisted covered wildlife species become listed under the ESA during the term of the permit, take authorization for those species would become effective upon listing. The specific federally listed endangered species proposed for coverage in this HCP are: the giant kangaroo rat (*Dipodomys ingens*), San Joaquin kit fox

(*Vulpes macrotis mutica*), Tipon kangaroo rat (*Dipodomys nitratooides nitratooides*), Buena Vista shrew (*Sorex ornatus relictus*), blunt-nosed leopard lizard (*Gambelia sila*), Kern mallow (*Eremalche kernensis*), and San Joaquin woolly-threads (*Lembertia congdonii*). The specific unlisted species proposed for coverage in the HCP are: the San Joaquin antelope squirrel (*Ammospermophilus nelsoni*), short-nosed kangaroo rat (*Dipodomys nitratooides brevinasus*), San Joaquin LeConte's thrasher (*Toxostoma lecontei macmillanoura*), western burrowing owl (*Athene cucularia hypugae*), Tejon poppy (*Eschscholzia lemmonii* ssp. *kernensis*), oil nestraw (*Stylocline citroleum*, and heartscale (*Atriplex cordulata*). Species may be added or deleted during the course of the development of the Plan based on further analysis, new information, agency consultation, and public comment.

The Federal government established the Elk Hills Oil and Gas Field in 1912 for national defense purposes as part of the Naval Petroleum Reserves (NPR). It was then referred to as "NPR-1" and operated by the U.S. Department of Energy (DOE). Given the potential effects of operating NPR-1 on listed species, DOE engaged in several formal consultations with the Service under section 7 of the ESA, resulting in the issuance by the Service of several Biological Opinions (the most recent opinion was completed in 1995). Congress directed DOE to sell NPR-1 in the National Defense Authorization Act for Fiscal year 1996 and authorized DOE to transfer the Incidental Take Statement contained in the 1995 Biological Opinion to the purchase of NPR-1. OEHI (the purchaser) is approaching the limit to take authorized in the 1995 Biological Opinion and therefore has applied for authorization for additional incidental take through this HCP.

The Plan area is located in the Elk Hills, 26 miles southwest of Bakersfield, California, and includes oil and gas reserves on the 47,729-acre Elk Hills Oil and Gas Field and a contiguous 2-mile-wide HCP Permit Area around the perimeter of the oil and gas field. The HCP would result in the permanent disturbance of up to 4,000 acres and the temporary disturbance of up to 3,000 acres of presently undisturbed land in the Elk Hills. The proposed duration of the HCP and the incidental take permit would be 50 years. The HCP would establish a 7,801-acre conservation area and habitat management program located on the northern and southern edges of the Elk Hills.
