

review by the NRC staff and may increase the time and resources needed for the review. Significant variations from the approach, or inclusion of additional changes to the license, will result in staff rejection of the submittal. Instead, licensees desiring significant variations and/or additional changes should submit a LAR that does not claim to adopt TSTF-374.

Public Notices: In a **Federal Register** Notice dated February 22, 2006 (71 FRN 9179), the NRC staff requested comment on the use of the CLIP to process requests to adopt the TSTF-374 changes. In addition, there have been multiple notices published for plant-specific amendment requests to adopt changes similar to those described in this notice.

The NRC staff's model SE and model application may be examined, and/or copied for a fee, at the NRC's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records are accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Library component on the NRC Web site, (the Electronic Reading Room).

The NRC staff received no responses following the notice published February 22, 2006 (71 FRN 9179), soliciting comments on the model SE and NSHC determination related to the TSTF-374 changes. The NRC staff finds that the previously published models remain appropriate references and has chosen not to republish the model SE and model NSHC determination in this notice. As described in the model application prepared by the NRC staff, licensees may reference in their plant-specific applications to adopt the TSTF-374 changes, the model SE, NSHC determination, and environmental assessment previously published in the **Federal Register** (71 FRN 9179); February 22, 2006).

Dated at Rockville, Maryland, this 14th day of April 2006.
