

EELV to take place at south VAFB over a 1-year period, contingent upon adherence to the previously mentioned mitigation, monitoring, and reporting requirements. NMFS has determined that the impact of harbor activities related to the Delta IV/EELV at VAFB (transport vessel operations, cargo movement activities, harbor maintenance dredging, and kelp habitat mitigation) will result in the Level B Harassment of small numbers of Pacific harbor seals, California sea lions, and northern elephant seals. The effects of ULA's harbor activities are expected to be in the form of short-term and localized behavioral changes and no take by injury or death is anticipated or authorized. NMFS has further determined that these takes will have a negligible impact on the affected marine mammal species and stocks. Northern fur seals, Guadalupe fur seals, and Steller sea lions are unlikely to be found in the area and, therefore, will not be affected. No rookeries, mating grounds, areas of concentrated feeding, or other areas of special significance for marine mammals occur within or near south VAFB harbor.

Authorization

NMFS has issued an IHA to take marine mammals, by Level B harassment, incidental to conducting harbor activities at VAFB to ULA for a 1-year period, provided the mitigation, monitoring, and reporting requirements are undertaken.

Dated: June 18, 2007.

James H. Lecky,

*Director, Office of Protected Resources,
National Marine Fisheries Service.*
