#### FOR FURTHER INFORMATION CONTACT:

Peter Cooper, [peter.cooper@noaa.gov](mailto:peter.cooper@noaa.gov), 301-427-8503.

**SUPPLEMENTARY INFORMATION:** Atlantic HMS fisheries (tunas, billfish, swordfish, and sharks) are managed under the 2006 Consolidated Atlantic HMS Fishery Management Plan (FMP) and its amendments pursuant to the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) and consistent with the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*). HMS implementing regulations are at 50 CFR part 635.

The Magnuson-Stevens Act requires the establishment of APs and requires NMFS to consult with and consider the comments and views of AP members during the preparation and implementation of FMPs or FMP amendments (16 U.S.C. 1854(g)(1)(A)-(B)). NMFS meets with the HMS AP approximately twice each year to consider potential alternatives for the conservation and management of Atlantic tunas, swordfish, billfish, and shark fisheries, consistent with the Magnuson-Stevens Act.

Some of the discussion topics are:

- Electronic reporting rulemaking update;
- HMS economic situation update; and
- General updates related to HMS.

We anticipate having other NMFS offices, other Federal agencies, and the U.S. Coast Guard to provide updates, if available, on their activities relevant to HMS fisheries. Additional information on the meetings and a copy of the draft agenda will be posted prior to the meeting (see **ADDRESSES**).

All members of the public will have virtual access to the meeting available via webinar and status updates of in-person public access to the meeting will be available on the NMFS website (see **ADDRESSES**). The meeting location is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Peter Cooper at 301-427-8503, at least 7 days prior to the meeting.

#### Abstract of Patent

Personal hydration systems with cooling and/or warming capability, and the components thereof are disclosed. The personal hydration systems may include a liquid transport system for transporting cooling or heating fluid between a reservoir and a pad, which pad is configured for wearing adjacent to a wearer's body. A pump is provided for pumping the liquid through the system. A drinking tube is connected to the system for removing liquid from the system. Liquid can be removed from the system for drinking by sucking on the end of the drinking tube. A check valve is used to bypass the pump so the user will not have to suck the liquid through the pump. Alternatively, liquid can be removed by spraying the liquid out of the drinking tube using the power of the pump.
