

Committee on progress to date on the development of an amendment to implement an SBRM process across all NEFMC fishery management plans (FMPs). There will be an open public comment period to address items not listed on the agenda prior to a lunch break. During the afternoon session the Council will review and approve a range of essential fish habitat designation alternatives for inclusion in its EFH Omnibus Amendment. This will be followed by Council approval of a scoping document for a Northeast Multispecies FMP amendment to consider limited access, hard Total Allowable Catches (TACs) and dedicated access privileges in the small mesh multispecies fisheries for whiting, red hake and offshore hake.

Wednesday, April 5, 2006

During the morning session of the meeting, the Council will review preliminary analyses for a groundfish total allowable catch management program that was discussed at its January meeting in Portland, ME. The Council will then review scoping comments and approve goals and objectives for Amendment 11 to the Sea Scallop FMP. It also will provide guidance to the Scallop Committee on the development of alternatives. The alternatives may include resource allocation options involving the limited access and general category scallop fisheries and potential qualification criteria for a limited entry program for general category vessels. The Council will initiate action on Framework Adjustment 4 to the Monkfish FMP and provide guidance on the development of management alternatives. Finally, the Research Steering Committee will report on its discussions concerning 2006 research priorities and recommendations on several cooperative research final reports. The committee also will provide additional comments and recommendations on the process to review final reports.

Although other non-emergency issues not contained in this agenda may come before this Council for discussion, those issues may not be the subjects of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided that the public has been notified of the Council's intent to take final action to address the emergency.

SUPPLEMENTARY INFORMATION:

Authority

Issuance of permits and permit
modifications, as required by the
Endangered Species Act of 1973 (16
U.S.C. 1531-1543) (ESA), is based on a
finding that such permits/modifications:
(1) Are applied for in good faith; (2)
would not operate to the disadvantage
of the listed species which are the
subject of the permits; and (3) are
consistent with the purposes and
policies set forth in section 2 of the
ESA. Authority to take listed species is
subject to conditions set forth in the
permits. Permits and modifications are
issued in accordance with and are
subject to the ESA and NOAA Fisheries
regulations governing listed fish and
wildlife permits (50 CFR parts 222-
226). Those individuals requesting a
hearing on an application listed in this
notice should set out the specific
reasons why a hearing on that
application would be appropriate (see
ADDRESSES). The holding of such a
hearing is at the discretion of the
