Notice of Environmental Assessment Related to the Issuance of a License Amendment to Byproduct Material License No. 24–32439–01, for the Unrestricted Release of a Pharmacia Corporation Building in St. Louis, MO

AGENCY: Nuclear Regulatory Commission.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of an amendment to NRC Byproduct Materials License No. 24–32439–01, which is held by The Pharmacia Corporation (the licensee), a wholly owned subsidiary of Pfizer, Inc. The issuance of the amendment would approve the licensee's April 1, 2009, request (ML090920862) to release for unrestricted use its building located at 645 South Newstead Avenue, St. Louis, Missouri (the Facility).

The NRC has prepared an Environmental Assessment (EA) in support of this proposed action in accordance with the requirements of Title 10, Code of Federal Regulations (CFR), Part 51 (10 CFR part 51). Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate with respect to the proposed action. The amendment will be issued to the licensee following the publication of this FONSI and EA in the **Federal Register**.

II. Environmental Assessment

Identification of Proposed Action

The proposed action would approve the licensee's April 1, 2009, license amendment request, resulting in the release of the Facility for unrestricted use consistent with the provisions of 10 CFR Part 20, Subpart E. The licensee was issued License No. 24–32439–01 on April 08, 2004, pursuant to 10 CFR Part 30, and the license has been amended periodically since that time. The license authorized the use of unsealed and sealed byproduct materials for conducting research and development activities, which included animal studies, gas chromatographs, and an irradiator. The Facility is a two story-building with an annex that contained research laboratories, offices, vivarium space, and other mechanical support areas.

The licensee ceased licensed activities at the Facility during March 2009 and initiated a survey and decontamination activities there. Based on the licensee's historical knowledge of the site and the Facility, the licensee determined that
