SUPPLEMENTARY INFORMATION: *Applicant:* Jack Kilgore, U.S. Army Corps of Engineers, Vicksburg, Mississippi, TE045109-0

The applicant requests authorization to take (capture, hold temporarily, identify, anesthetize, take the two most anterior pectoral fin rays and associated tissue, floy tag, PIT tag, and stomach flush) the pallid sturgeon (*Scaphirhynchus albus*) from the Lower Mississippi River (from the mouth of the Missouri River to the mouth of the Mississippi River). Little information exists on pallid sturgeons in the Lower Mississippi River, which hampers recovery efforts and river management decisions. Consequently, a multi-year field study in the Lower Mississippi River is being developed by the Corps of Engineers, in cooperation with the U.S. Fish and Wildlife Service, to quantify habitat preferences and life history characteristics of the pallid sturgeon. The objectives of the study are to evaluate habitat preferences by life stage and season; quantify mortality, density, age, and growth; and to evaluate diet and food preferences.
