[Project No. 15378-000]

Kram Hydro 6, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On October 21, 2024, Kram Hydro 6, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of a hydropower project that would be located at the U.S. Army Corps of Engineers' (Corps) Dewey Lake Dam on John's Creek, near the City of Paintsville, in Floyd County, Kentucky. The sole purpose of a preliminary

permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Dewey Lake Dam Hydroelectric Project would consist of the following: (1) a 40-foot-wide, 85-foot-long armored intake channel; (2) a 20-foot-diameter, 1,400-foot-long penstock; (3) a 70-foot-long, 120-foot-wide concrete powerhouse located downstream of the dam on the west bank, containing two Kaplan turbine-generator units, with a combined capacity of 5.5 megawatts; (4) a 30-foot-long, 50-foot-wide unlined tailrace; (5) a substation, adjacent to the powerhouse; and (6) a 150-foot-long, 69 kilovolt transmission line that would interconnect with an existing distribution line. The proposed project would have an estimated annual generation of 24 gigawatt-hours.
