

*Title:* Item Approval Request List.

*OMB number:* 3095-0025.

*Agency form number:* NA Form 14110.

*Type of review:* Regular.

*Affected public:* Business or for-profit, nonprofit organizations and institutions, federal, state and local government agencies, and individuals or households.

*Estimated number of respondents:* 2,616.

*Estimated time per response:* 15 minutes.

*Frequency of response:* On occasion.

*Estimated total annual burden hours:* 654 hours.

**Abstract:** The information collection is prescribed by 36 CFR 1254.72. The collection is prepared by researchers who cannot visit the appropriate NARA research room or who request copies of records as a result of visiting a research room. NARA offers limited provisions to obtain copies of records by mail and requires requests to be made on prescribed forms for certain bodies of records. NARA uses the Item Approval Request List form to track reproduction requests and to provide information for customers and vendors.

Dated: October 18, 2010.

**Charles K. Piercy,**

*Acting Assistant Archivist for Information Services.*

## NATIONAL SCIENCE FOUNDATION

### Agency Information Collection Activities: Comment Request

**ACTION:** Notice.

**SUMMARY:** Under the Paperwork Reduction Act of 1995, Public Law 104-13 (44 USC U.S.C. 3506(c)(2)(A)), and as part of its continuing effort to reduce paperwork and respondent burden, the National Science Foundation invites the general public and other Federal agencies to take this opportunity to comment on this information collection.

*Comments:* Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to

minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

**DATES:** Written comments should be received by December 27, 2010 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

**ADDRESSES:** Written comments regarding the information collection and requests for copies of the proposed information collection request should be addressed to Suzanne Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Blvd., Rm. 295, Arlington, VA 22230, or by e-mail to [splimpto@nsf.gov](mailto:splimpto@nsf.gov).

*For Additional Information or Comments:* Contact Suzanne Plimpton, the NSF Reports Clearance Officer, phone (703) 292-7556, or send e-mail to [splimpto@nsf.gov](mailto:splimpto@nsf.gov). Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including Federal holidays).

#### SUPPLEMENTARY INFORMATION:

*Title:* Experimental Program to Stimulate Competitive Research (EPSCoR) Outcomes Survey.

*OMB Approval Number:* 3145-NEW.  
*Expiration Date of Approval:* Not applicable.

#### Abstract

The National Science Foundation (NSF) Act of 1950 (Pub. L. 507-81st Congress, as amended) stated that “\* \* \* it shall be an objective of the Foundation to strengthen science and engineering research potential and education at all levels throughout the United States; and avoid undue concentration of such research and education, respectively.” This Congressional directive recognized the inherent value of a truly national scientific and engineering (S&E) research enterprise. Over time, however, the nation's S&E efforts became concentrated geographically, focusing primarily on a limited number of major research universities. The NSF's resources became concentrated to the point where in 1977, in response to congressional concerns; the National Science Board established a task force to

examine the geographical distribution of NSF awards. The issue was discussed at the 195th meeting of the NSB. Approval was requested for initiation of a program designed to “stimulate competitive research in regions of the country that were less able to compete successfully for research funds.” In 1978 the NSB approved a resolution (NSB-78-12) establishing the *Experimental Program to Stimulate Competitive Research (EPSCoR)* and the general guidelines for its management.

The mission of EPSCoR is to assist the National Science Foundation in its statutory function “to strengthen research and education in science and engineering throughout the United States and to avoid undue concentration of such research and education.”

The EPSCoR goals are to: (1) Provide strategic programs and opportunities for EPSCoR participants that stimulate sustainable improvements in their R&D capacity and competitiveness; and (2) advance science and engineering capabilities in EPSCoR jurisdictions for discovery, innovation, and overall knowledge-based prosperity.

The EPSCoR objectives are to: (1) Catalyze key research themes and related activities within and among EPSCoR jurisdictions that empower knowledge generation, dissemination and application; (2) activate effective jurisdictional and regional collaborations among academic, government and private sector stakeholders that advance scientific research, promote innovation and provide multiple societal benefits; (3) broaden participation in science and engineering by institutions, organizations and people within and among EPSCoR jurisdictions; and (4) use EPSCoR for development, implementation and evaluation of future programmatic experiments that motivate positive change and progression.

#### Expected Respondents

The respondents will be current and former EPSCoR awardees based at academic; state and local governments; and non-profit organizations. Quantitative procedures will be fielded using web-based modes. Up to 200 EPSCoR awardees will be contacted to request their participation in the survey. As needed, each EPSCoR awardee will be contacted with reminders to complete the survey no more than twice during the survey's duration under this generic clearance. Technology will be heavily utilized to limit the burden on respondents.

### Use of the Information

The purpose of this survey of EPSCoR awardees is to better understand outcomes of NSF EPSCoR-related investments. The data will be used internally to inform NSF as it considers future improvements to the EPSCoR program, and to gain a better understanding regarding the program's impact on associated research and education activities. Findings may be presented externally to Congress, the Office of Management and Budget (OMB), in technical papers at conferences, published in the proceedings of conferences, or in journals.

### Burden on the Public

*Number of Respondents:* 200.  
*Number of Minutes per Response:* 30.  
*Overall Burden Request (in hours):* 100.

Dated: October 22, 2010.

## NUCLEAR REGULATORY COMMISSION

### Seeks Qualified Candidates for the Advisory Committee on Reactor Safeguards

**AGENCY:** U.S. Nuclear Regulatory Commission.

**ACTION:** Request for résumés.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) seeks qualified candidates for the Advisory Committee on Reactor Safeguards (ACRS). Submit résumés to Ms. Brandi Hamilton, ACRS, Mail Stop T2E-26, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or e-mail [brandi.hamilton@NRC.GOV](mailto:brandi.hamilton@NRC.GOV).

**SUPPLEMENTARY INFORMATION:** The ACRS is a part-time advisory group, which is statutorily mandated by the Atomic Energy Act of 1954, as amended. ACRS provides independent expert advice on matters related to the safety of existing and proposed nuclear power plants and on the adequacy of proposed reactor safety standards. Of primary importance are the safety issues associated with the operation of 104 commercial nuclear power plants in the United States and regulatory initiatives, including risk-informed and performance-based regulations, license renewal, power uprates, and the use of mixed oxide and high burnup fuels. An increased

emphasis is being given to safety issues associated with new reactor designs and technologies, including passive system reliability and thermal hydraulic phenomena, use of digital instrumentation and control, international codes and standards used in multinational design certifications, materials and structural engineering, nuclear analysis and reactor core performance, and nuclear materials and radiation protection. In addition, the ACRS may be requested to provide advice on radiation protection, radioactive waste management and earth sciences in the agency's licensing reviews for fuel fabrication and enrichment facilities, and for waste disposal facilities.

The ACRS also has some involvement in security matters related to the integration of safety and security of commercial reactors. See NRC Web site at <http://www.nrc.gov/aboutnrc/regulatory/advisory/acrs.html> for additional information about ACRS. Criteria used to evaluate candidates include education and experience, demonstrated skills in nuclear reactor safety matters, the ability to solve complex technical problems, and the ability to work collegially on a board, panel, or committee. The Commission, in selecting its Committee members, considers the need for a specific expertise to accomplish the work expected to be before the ACRS. ACRS Committee members are appointed to four-year terms and normally serve no more than three terms. The Commission looks to fill two vacancies as a result of this request. For these positions, a candidate must have at least 10 years of broad experience in either of the following areas:

- Nuclear plant operations with demonstrated experience and integrated knowledge of nuclear power plant electrical, mechanical, and control systems.
- A distinguished record of achievement in one or more areas of nuclear science and technology.

Candidates with pertinent graduate level experience will be given additional consideration. Consistent with the requirements of the Federal Advisory Committee Act, the Commission seeks candidates with diverse backgrounds, so that the membership on the Committee is fairly balanced in terms of the points of view represented and functions to be performed by the Committee. Candidates will undergo a thorough security background check to obtain the security clearance that is mandatory for all ACRS members. The security background check will involve the

completion and submission of paperwork to NRC. Candidates for ACRS appointments may be involved in or have financial interests related to NRC-regulated aspects of the nuclear industry. However, because conflict-of-interest considerations may restrict the participation of a candidate in ACRS activities, the degree and nature of any such restriction on an individual's activities as a member will be considered in the selection process. Each qualified candidate's financial interests must be reconciled with applicable Federal and NRC rules and regulations prior to final appointment. This might require divestiture of securities or discontinuance of certain contracts or grants. Information regarding these restrictions will be provided upon request. A résumé describing the educational and professional background of the candidate, including any special accomplishments, publications, and professional references should be provided. Candidates should provide their current address, telephone number, and e-mail address. All candidates will receive careful consideration. Appointment will be made without regard to factors such as race, color, religion, national origin, sex, age, or disabilities. Candidates must be citizens of the United States and be able to devote approximately 100 to 130 days per year to Committee business. Résumés will be accepted **for 90 days from date of issue.**

Dated: October 21, 2010.

**Annette L. Vietti-Cook,**

*Secretary of the Commission.*

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-63145; File No. SR-Phlx-2010-143]

### Self-Regulatory Organizations; NASDAQ OMX PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Active SQF Port Fee

October 21, 2010.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on October 15, 2010, NASDAQ OMX PHLX LLC ("Phlx" or "Exchange") filed with the Securities and Exchange Commission

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.
