This statute mandates that FSIS protect the public by verifying that meat products are safe, wholesome, unadulterated, and properly labeled and packaged. Establishments operating under NSIS are required to (1) identify animals or carcasses that establishment personnel have sorted and removed for disposal before FSIS inspection with a unique tag, tattoo, or similar device, (2) maintain records to document the total number of animals and carcasses sorted and removed per day and the reasons for their removal, and (3) maintain records documenting that products resulting from their slaughter operations meet the new definition of RTC pork product.

Furthermore, FSIS will collection information to ensure that each establishment operating under the NSIS submit on an annual basis an attestation to the management member of the local FSIS circuit safety committee stating

that it maintains a program to monitor and document any work-related conditions of establishment workers.
