Intent To Prepare a General Reevaluation Report and Draft Environmental Impact Statement for the Atlantic Coast of Maryland Shoreline Protection Project, Ocean City, MD

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: In accordance with the National Environmental Policy Act (NEPA), the Baltimore District, U.S. Army Corps of Engineers (USACE), will conduct a General Reevaluation Report (GRR) and Draft Environmental Impact Statement (DEIS) to evaluate new sand borrow areas for the continued beach replenishment at Ocean City, Maryland, and potential modifications to the existing project to better protect Ocean City at areas of high erosion.

The Atlantic Coast of Maryland Shoreline Protection Project, Ocean City, Maryland, is designed to provide coastal flood and erosion protection to Ocean City. As part of the project design, periodic renourishment and maintenance of the beach are required to maintain the design level of protection. Every four years, approximately 800,000 cubic yards of sand are required to renourish and maintain the beaches. The original feasibility report identified borrow areas that will be consumed within the next eight years (two beach renourishment cycles) or less, assuming no extreme storm events. Estimates show that approximately 10-12 million cubic yards of sand are needed to maintain the four-year cycles for the remaining project life. The District proposes to analyze, evaluate, and select the best site(s) for additional borrow material.

In addition, the project has experienced three persistent areas of erosion, or hot spots, that have required significant amounts of sand renourishment since the project's inception. These areas, centered on 32nd Street, 81st Street, and 146th Street have been examined in the past, and several potential cost-effective solutions were identified. The second purpose of this reevaluation study and resulting GRR is to analyze, evaluate, and select the best alternative to reduce maintenance costs for two of the three areas. The area at 146th Street has been addressed by the Corps' Philadelphia District's Fenwick Island, Delaware, Interim Feasibility Study—Final Integrated Feasibility Report and Environmental Impact Statement.

The study will be conducted in compliance with Section 404 and Section 401 of the Clean Water Act, Section 7 of the Endangered Species Act, the Clean Air Act, the U.S. Fish and Wildlife Coordination Act, Section 106 of the National Historic Preservation Act, Prime and Unique Farmlands, the Magnuson-Stevens Fishery Conservation and Management Act, and National Pollutant Discharge Elimination System Act.
