DEPARTMENT OF HEALTH AND HUMAN SERVICES

Putting the Person at the Center: Integrating Plans for Long-Term Services and Supports and Health Care Delivery through Health Information Technology; Public Workshop; Request for Comments

AGENCY: Administration for Community Living and Office of the National Coordinator on Health Information Technology, Department of Health and Human Services.

ACTION: Notice of public workshop; request for comments.

The Administration for Community Living (ACL) and the Office of the National Coordinator for Health Information Technology (ONC) of the U.S. Department of Health and Human Services announce the following workshop, *Putting the Person at the Center: Integrating Plans for Long-Term Services and Supports and Health Care Delivery through Health Information Technology*. ACL and the ONC (collectively referred to for the purpose of this notice as "the Agencies") seek input from stakeholders and experts on the use of health information technology (health IT) to enable a person-centered approach for planning and delivering both long-term services and supports (LTSS) and health care, including how to improve communication and collaboration among community-based

organizations and health care partners. The topics to be discussed include person-centered planning and how it can serve as a focus for integrating health IT and LTSS; key opportunities and challenges; and, delivery and payment reform policy levers that could be used to accelerate the development of technology solutions in this arena.

Using health IT to support person and family-centered planning can provide a path to improving communication and quality of health care and LTSS, and ensuring that the individual's preferences, priorities and goals are the foundation for that plan and are addressed across the spectrum of health care and LTSS settings. Health care LTSS providers play a critical role in this care continuum. However the pace of health IT adoption and interoperable communication varies across systems. Interoperable health IT systems that reach across settings and health care and community partners would not only enhance communication, transitional care, and care coordination activities currently underway within programs funded by the Affordable Care Act, but could also facilitate the development of an accessible, integrated, person-centered plan that would better allow individuals to achieve their goals, manage their services, and enhance their quality of life.

Date and Times: The public workshop will be held on Thursday, October 16, 2014 from 9 a.m. to 4:15pm.

Location: The public workshop will be held at the Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington DC 20201, Room 800.
