Federal Railroad Administration

[Docket Number FRA–2013–0010]

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated January 31, 2013, the Chessie Logistics Company LLC (CLCY), a Class III railroad, has petitioned the Federal Railroad Administration (FRA) for a waiver of

compliance from certain provisions of the Federal railroad safety regulations. FRA assigned the petition Docket Number FRA–2013–0010.

Specifically, CLCY has petitioned for a waiver of compliance from the requirements of: 49 CFR Sections 223.11, Requirements for existing locomotives; 231.30, Locomotives used in switching service; 229.47, Emergency brake valve; 229.115, Slip/slide alarms; 229.125, Headlights and auxiliary lights; 224.105, Sheeting dimensions and quantity; 224.106, Location of retroreflective sheeting; 229.129, Locomotive horn; 229.131, Sanders; and 229.135, Event recorders. CLCY seeks this waiver for its 5TM track mobile, CLCY 106. CLCY employs the track mobile for yard and industry switching, which is confined to CLCY's tracks within the J. Emil Anderson & Son, Inc. Industrial Park, located in Melrose Park, Cook County, IL. CLCY operates on 1.06 miles of track and 431 feet of siding. It interchanges railcars with the Indiana Harbor Belt Railroad on a transfer track that is west of Mannheim Road. CLCY is the sole rail operator on this line and provides rail service to two shippers. The 5TM track mobile switches, shoves, and pulls all railcars with their train air brakes cut in to maintain control of all switching movements. The track mobile will always operate at speeds not to exceed 10 mph. CLCY will not use a locomotive for these switching operations.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE., W12–140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal Holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2002–11809]

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that the North County Transit District (NCTD) has petitioned the Federal Railroad Administration (FRA) to modify NCTD's petition for approval of Shared Use and waiver of compliance from certain provisions of the Federal railroad safety regulations (Shared Use waiver) to include 49 CFR Part 228–Hours of Service of Railroad Employees; Recordkeeping and Reporting; Sleeping Quarters. (See Statement of Agency Policy Concerning Jurisdiction Over the Safety of Railroad Passenger Operations and Waivers Related to Shared Use of the Tracks of the General Railroad System by Light Rail and Conventional Equipment, 65 FR 42529 (July 10, 2000). See also Joint Statement of Agency Policy Concerning Shared Use of the Tracks of the General Railroad System by Conventional Railroads and Light

Rail Transit Systems, 65 FR 42626 (July 10, 2000).) FRA assigned the petition Docket Number FRA–2002–11809.

NCTD operates its SPINTER light rail transit system (SPINTER) between Oceanside and Escondido, CA. On June 24, 2003, FRA issued the initial waiver that granted NCTD conditional relief from certain Federal railroad safety regulations, provided that NCTD maintains temporal separation on track that is shared between SPINTER and freight railroads so that each would operate at separate and distinct portions of the day and would not operate on the shared track at the same time. Since 2003, NCTD has requested and been granted additional relief from FRA.

NCTD's SPINTER also falls under the safety oversight of the California Public Utilities Commission (CPUC) as authorized by the Federal Transit Administration.

NCTD's requested modification to its existing Shared Use waiver seeks relief from the hours of service requirements for its light rail transit (LRT) operators. In its petition, NCTD states that SPINTER operates with an engineer-only train crew. Additionally, NCTD's operator training and qualification program for SPINTER is approved and monitored by the CPUC. NCTD's program complies with CPUC's General Order 143-B, Section 12.04, which provides that LRT systems shall not allow any safety sensitive employees to remain on duty for more than 12 consecutive hours or more than an aggregate of 12 hours distributed over a period of 16 hours. Finally, NCTD states that the dispatch and signal employees for SPINTER will continue to meet all of the requirements of 49 CFR Part 228.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's Docket Operations Facility, 1200 New Jersey Ave. SE., W12–140, Washington, DC 20590. DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2001–9717]

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated February 22, 2011, the Little Kanawha River Railroad (LKRR), a division of Marietta Industrial Enterprises, Inc., has petitioned the Federal Railroad Administration (FRA) for an extension of a waiver of compliance from certain provisions of the Federal railroad safety regulations regarding safety glazing contained at 49 CFR Part 223. FRA assigned the petition Docket Number FRA–2001–9717.

LKRR seeks to extend a waiver of compliance for one locomotive, specifically, one 1955 General Motors'

Electro-Motive Division Model SW–1200, Number LKRR 1205, from 49 CFR Section 223.11, Requirements for existing locomotives. FRA issued the initial waiver that granted LKRR relief on May 20, 2002, and FRA extended the waiver on August 7, 2006.

The current glazing that is installed in the locomotive has no identifying marks. LKRR states that it operates on 1.75 miles of level track at speeds not exceeding 10 mph, as a yard-type system. LKRR interchanges directly with the CSX Corporation (CSX), and it is a shortline operation that only moves CSX cars for loading and unloading. LKRR states that it operates in a secure area and there have been no known incidents of broken windows as a result of vandalism and, therefore, no resulting worker injuries have occurred due to broken glass from the locomotive's windows. LKRR is requesting an extension of relief on account of the prohibitive cost involved in retrofitting the locomotive with certified glazing.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's Docket Operations Facility, 1200 New Jersey Ave. SE., W12–140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal Holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.
