

to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 2 States/Tribes to request program assumption; 20,000 permit applicants, 4 assumed States/Tribes.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: One time to request assumption; one time when requesting a permit; annually for the annual permit and annual report.

Estimated total annual burden hours: 101,360 (520 hours to request assumption times two States/Tribes (1,040 hours); 20,000 permit applicants times 5 hours per application (100,000 hours); 80 hours per annual report times 4 States/Tribes (320 hours).

Estimated total annual costs: \$41,200 (includes \$0 annualized capital and O&M costs).

Are There Changes in the Estimates From the Last Approval?

There are changes in the estimates from the last approval. These changes are to account for increases in wages.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: June 23, 2006.

Title: Information Collection Request for Proposed Regional Haze Regulations (Renewal).

ICR numbers: EPA ICR No. 1813.06, OMB Control No. 2060-0421.

ICR Status: This ICR is scheduled to expire on July 31, 2006. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR parts 9.

Abstract: This ICR is for activities related to the implementation of EPA's 1999 regional haze rule, for the time period between August 1, 2006 and July 31, 2009. This ICR renews the previous ICR, which addressed the second three year time period after the rule was promulgated. The regional haze rule, as authorized by sections 169A and 169B

of the Clean Air Act, requires States to develop implementation plans to protect visibility in 156 federally-protected Class I areas. Tribes may choose to develop implementation plans. For this time period, States will be conducting technical analyses in support of development of reasonable progress goals and strategies for regional haze, as required by the rule. EPA has encouraged States to work together in regional planning organizations to develop and implement multi-state strategies.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 38 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: The major categories of respondents directly affected include the States, Tribes, and Federal land managers (FLMs). The States and, if they so choose, the Tribes will develop an implementation plan under 40 CFR 51.308. In addition Western States have the option of developing Regional Haze strategies for SO₂ emissions under 40 CFR 51.309.

In addition, during this ICR renewal period, other entities, at the discretion of the States and Tribes, may respond to a request of the States or Tribes to fulfill obligations of the 1999 Regional Haze Rule. For example, there may be private sector respondents in particular Standard Industrial Classification (SIC) and North American Industrial Classification System (NAICS) Codes and production process categories that are asked to assess and determine if they are BART eligible sources and make a preliminary BART determination.¹

¹ Sources that are part of categories listed in the Clean Air Act (section 169A) and emitting more than 250 tons per year and constructed during the August 1962 to August 1977 time period are BART eligible.

The FLMs will work as partners with the RPOs from the perspective of Class I area land managers. Their policy focus will be on prescribed fire policy, and quantification of reasonable progress goals. On the technical side, they will assess air quality monitoring data and work with the RPOs and EPA to determine impacts on visibility in their Class I areas and natural background conditions.

Estimated Number of Respondents: 860.

Frequency of Response: Annual.

Estimated Total Annual Hour Burden: 32,551.

Estimated Total Annual Cost: \$1,856,000, which includes \$0 annualized capital startup costs, \$0 annual O&M Costs, and \$1,856,000 annual labor costs.

Changes in the Estimates: There is a decrease of 24,054 hours in the total estimated hourly burden and in the cost burden of \$657,383 currently identified in the OMB Inventory of Approved ICR Burdens. This decrease in burden is a program adjustment, reflecting changes in labor rates, changes in the activities conducted due to the normal progression of the program, and better information regarding the numbers of respondents and the fact that the role of industrial respondents is increasing as the program moves from the planning stages to the implementation stages.
