

Research<sup>1</sup> to help ensure that drugs marketed in the United States are safe and effective for their intended uses and will be manufactured in a manner that ensures quality.

The recommendations in this guidance are intended to address the legal definitions and regulatory controls related to cannabis, and to address certain questions raised about drugs containing cannabis. The guidance also introduces key FDA regulatory concepts to stakeholders who may be less familiar with FDA or our authorities than other drug developers.

This guidance finalizes the draft guidance entitled “Cannabis and Cannabis-Derived Compounds: Quality Considerations for Clinical Research” issued on July 22, 2020 (85 FR 44305). FDA considered comments received on the draft guidance as the guidance was finalized. Changes from the draft to the final guidance include clarifying sources of cannabis for clinical research (including Schedule I sources), adding resources that explain expectations for INDs in various stages of drug development, and providing guidance on quality considerations for INDs. The final guidance also lists applicable U.S. Pharmacopeia chapters on quality testing, including the assessment of leachables from packaging and delivery systems. Further, the guidance addresses the calculation of delta-9 THC content, which is relevant to determine control status for cannabis and cannabis-derived compounds. In addition, editorial changes were made to improve clarity, including better explaining FDA’s authority to regulate human drugs and renaming subsection III.C to emphasize that this section relates to control status considerations under the CSA.

This guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on “Cannabis and Cannabis-Derived Compounds: Quality Considerations for Clinical Research.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.
